## The Elements Of Cal:

*California. Supreme Court. Records and Briefs* California (State)., *Pynchon's California* Scott McClintock, John Miller, 2014-11-01 Pynchon's California is the first book to examine Thomas Pynchon's use of California as a setting in his novels. Throughout his 50-year career, Pynchon has regularly returned to the Golden State in his fiction. With the publication in 2009 of his third novel set there, the significance of California in Pynchon's evolving fictional project becomes increasingly worthy of study. Scott McClintock and John Miller have gathered essays from leading and up-and-coming Pynchon scholars who explore this topic from a variety of critical perspectives, reflecting the diversity and eclecticism of Pynchon's fiction and of the state that has served as his recurring muse from *The Crying of Lot 49* (1965) through *Inherent Vice* (2009). Contributors explore such topics as the relationship of the California novels to Pynchon's more historical and encyclopedic works, the significance of California's beaches, deserts, forests, freeways, and hieroglyphic suburban sprawl, the California-inspired noir tradition, and the surprising connections to be uncovered between drug use and realism, melodrama, and real estate, private detection, and the sacred. The authors bring insights to bear from an array of critical, social, and historical discourses, offering new ways of looking not only at Pynchon's California novels but at his entire oeuvre. They explore both how the history, geography, and culture of California have informed Pynchon's work and how Pynchon's ever-skeptical critical eye has been turned on the state that has been in many ways the flagship for postmodern American culture.

CONTRIBUTORS: Hanjo Berressem, Christopher Coffman, Stephen Hock, Margaret Lynd, Scott MacLeod, Scott McClintock, Bill Millard, John Miller, Henry Veggian.

Court of Appeal (4th Appellate District). Division 2. Records and Briefs* California (State)., Consolidated Case s E008218 Ecosystems of California Harold Mooney, Erika Zavaleta, 2016-01-19 This long-anticipated reference and sourcebook for California's remarkable ecological abundance provides an integrated assessment of each major ecosystem type, its distribution, structure, function, and management. A comprehensive synthesis of our knowledge about this biologically diverse state, *Ecosystems of California* covers the state from oceans to mountaintops, using multiple lenses: past and present flora and fauna, aquatic and terrestrial, natural and managed. Each chapter evaluates natural processes for a specific ecosystem, describes drivers of change, and discusses how that ecosystem may be altered in the future. This book also explores the drivers of California's ecological patterns and the history of the state's various ecosystems, outlining how the challenges of climate change and invasive species and opportunities for regulation and stewardship could potentially affect the state's ecosystems. The text explicitly incorporates both human impacts and conservation and restoration efforts, and shows how ecosystems support human well-being. Edited by two esteemed ecosystem ecologists and with overviews by leading experts on each ecosystem, this definitive work will be indispensable for natural resource management and conservation professionals, as well as for undergraduate or

graduate students of California's environment and curious naturalists
