Transition From Communism To Capitalism:

The Transition from Capitalism to Socialism John D. Stephens, 1979-09-19 *The Transition from Communism to Capitalism* David Lane, Cameron Ross, 1999 Crucial to the understanding of breakdown and transition are analyses of changes within the internal relations of national elites In this text the authors define and detail the political elites under state socialism showing how the elites under Gorbachev were profoundly fragmented They further reveal how with the maturation of state socialism new class interests arose which were cultivated by and in turn influenced the Gorbachev leadership The authors put forth the argument that these class interests are strongly represented in today's political settlement in Russia They consider various interpretations of what has led to Russia's condition including the idea that executive capital is more important than political capital and has been reproduced in the transition from communism The work ends with a conclusion that details why the elite structure in the transition to capitalism is quite different from the incumbent elites in the former Soviet Union

Transition to Capitalism? János Mátyás Kovács, 1994-01-01 This work observes how the political ideologies social values and theoretical paradigms of Eastern European scholars and politicians changed throughout the period of transformation following the 1989 political revolutions in Eastern Europe The authors try to reinterpret the institutions movements and ideologies that allegedly contributed to the erosion of the old regimes in Eastern Europe asking whether these alternative legacies of communism support the transition to capitalism

China in Transition Ronald Glassman, 1991-08-30 As recent events in the Far East have demonstrated China is a nation that is in the midst of a massive social and political upheaval The Chinese leadership is as uncertain as the populace on the future course for modern China and remains dramatically split over capitalism and communism pragmatism and realism and democracy and despotism In this work Ronald Glassman analyzes the remarkable changes that are occurring in China and examines the country's difficult movement from state run economics to free enterprise and from Communist Party dictatorship to electoral democracy The book focuses on the emergence of a modern middle class in China illuminating their political and economic desires and their impact in a postcommunist society Glassman provides a Weberian analysis of the recent radical changes using the concepts of rationalization the bureaucratic middle strata the greater degree of efficiency of capitalism over socialism the independent power of the state and charismatic leadership to help explain China's transition to modernity His study is divided into four sections covering the majority middle class and democracy free enterprise and democracy the transition to a legal democratic state and political culture legitimacy and charisma The book concludes with the thesis that China will make the transition to democracy when the new generation of leaders comes to power and the middle class becomes the mediating stratum Students of sociology political science and Chinese history will find this work to be a valuable resource as will both public and academic libraries

The Transition to Socialist Economy Charles Bettelheim, 1968 *Transition to Capitalism?* János Mátyás Kovács, 1994-01-01 This work observes how the political ideologies social values and theoretical

paradigms of Eastern European scholars and politicians changed throughout the period of transformation following the 1989 political revolutions in Eastern Europe. The authors try to reinterpret the institutions, movements, and ideologies that allegedly contributed to the erosion of the old regimes in Eastern Europe, asking whether these alternative legacies of communism support the transition to capitalism.

Nikolai Bukharin and the Transition from Capitalism to Socialism Michael Haynes, 2019-11-21. First published in 1985. Although Bukharin wrote against the background of the Russian Revolution, the very change in political climate is always relevant. How exactly is the transition from capitalism to socialism conceived and achieved? Michael Haynes' study shows that the theoretical applicability of Bukharin's ideas is still far from exhausted, and he provides a clear exposition of his main themes, which does not shirk criticism. There can be no better introduction to the thought of this important theorist.

The Transition from Capitalism to Socialism Viktor Neznanov, 1983. **The Transition from Communism to Capitalism** John Bennett, 1995. *Syndicalism and the Transition to Communism* Ralph Darlington, 2013-06-28. During the first two decades of the twentieth century, amidst an extraordinary international upsurge in strike action, the ideas of revolutionary syndicalism developed into a major influence within the world-wide trade union movement. Committed to destroying capitalism through direct industrial action and revolutionary trade union struggle, the movement raised fundamental questions about the need for new and democratic forms of power through which workers could collectively manage industry and society. This study provides an all-embracing comparative analysis of the dynamics and trajectory of the syndicalist movement in six specific countries: France, Spain, Italy, America, Britain, and Ireland. This is achieved through an examination of the philosophy of syndicalism and the varied forms that syndicalist organisations assumed, the distinctive economic, social, and political context in which they emerged, the extent to which syndicalism influenced wider politics, and the reasons for its subsequent demise. The volume also provides the first ever systematic examination of the relationship between syndicalism and communism, focusing on the ideological and political conversion to communism undertaken by some of the syndicalist movement's leading figures and the degree of synthesis between the two traditions within the new communist parties that emerged in the early 1920s.

The Workers Monthly, 1925. **An Outline of Political Economy** Iosif Abramovich Lapidus, Iosif Lapidus, Konstantin Ostrovitiĭ, Konstantin Vasil'evich Ostrovitiĭ, 1929. *The Political Economy of Asian Transition from Communism* Sujian Guo, 2017-11-28. A comparative study of the political economy of the transition from communism in East and Southeast Asian countries: China, North Korea, Vietnam, Laos, and Cambodia, addressing the key theoretical questions generated from the debate between shock therapists and gradualists. While accurately defining the pre-reform model, this book explores the causal variables that have contributed to reform efforts within Asia, examining the significance of the sequencing of political and economic transition and the interplay between politics and the economy in determining variations in transition outcomes. Comparing the real-world experiences of transition nations in communist Asia with Eastern Europe, prominent questions are brought to the fore, will

market capitalism or market socialism prevail after the grand failure of communism This book makes an important contribution to the political economy theory of comparative communist and post communist studies and provides detailed analytical insights that will prove influential in future theoretical work *On Trans to Socialism* Paul M. Sweezy, Charles Bettelheim, 1971 **National Union Gleanings**, 1921 **Soviet Russia Pictorial**, 1922 **Transitions to Capitalism and Democracy in Russia and Central Europe** M. Donald Hancock, John Logue, 2000-04-30 Hancock and Logue along with their contributors seek to explicate the achievements problems and prospects of simultaneous processes of economic and political transitions from communism to contrasting forms of market economies and democracy in Russia Poland the Czech Republic Hungary Slovenia and eastern Germany Contributors include 14 American and European scholars with intimate professional and personal familiarity with the various case studies The contributors draw on process analysis and transition theory to explore different national approaches to privatization This includes individual voucher schemes the use of investment funds the direct sale of former state owned enterprises employee buy outs direct foreign investments and their consequences for parallel processes of marketization and democratization A quarter of the volume is devoted to comparative analyses of contrasting modes of privatization the role of public opinion and law in the transition process and the international economic and political context of postcommunist transformation An important analysis for scholars students and other researchers involved with postcommunist economic and political change **The Great Rebirth** Simeon Djankov, 2014-10-10 The fall of communism transformed the political and economic landscape in more than two dozen countries across Europe and Asia In this volume published on the 25th anniversary of the fall political leaders scholars and policymakers assess the lessons learned from the great rebirth of capitalism and highlight the policies that were most successful in helping countries make the transition to stable and prosperous market economies Also discussed in this book are examples of countries reverting to political and economic authoritarianism The authors of these essays conclude that the best outcomes resulted from visionary leadership a willingness to take bold steps privatization of state owned enterprises and deregulation Recent backsliding in Russia and Hungary has cast a shadow over the legacy of the transition a quarter century ago however This volume grew out of a two day symposium of experts and practitioners reflecting on the past present and future of reform held in Budapest Hungary on May 6 7 2014 **Juche! The Speeches and Writings of Kim Il Sung** Il-sŏng Kim, 1972 *Capitalism, Communism, and the Transition* Emile Burns, 1933
