Travelling In:

Travelling In and Out of Italy Emanuele Occhipinti, 2011-05-25 Travel has often been taken as a metaphor for human life and the concept of travel and the traveller has varied across centuries cultural traditions and social groups Following a diachronic overview of travel writing this study considers some of the most important Italian writers of the late nineteenth and twentieth centuries such as D Annunzio Pirandello Svevo with particular focus on their note books letters travel diaries and reportage An analysis of this material indicates that these authors collect their miscellaneous notes in some cases as private and personal documents and in other instances to possibly develop future articles essays or novels It goes on to focus on the journey par excellence the trip to America regarded as an Eden In many of their works writers such as Ojetti Giacosa Cecchi Piovene express their ambivalence towards a place often idealized as a land of freedom and opportunity yet also acknowledged as a land where oppression and violence are all too real The study attempts to demonstrate how all the traveller writers discussed translate their sense of discovery in their books and the extent to which that sense affects the conception of each of the texts

Travelling Through Education Ole Skovsmose, 2005-01-01 This is a personal notebook from a conceptual travel But in a different sense it also represents a report on travelling The main part of the manuscript was written in Brazil Denmark and England whilst notes have also been inspired by visits to other countries So the book not only represents conceptual travel it also reflects seasons of real travelling In Part 1 the book comments on the critical position of mathematics education and also indicates some concerns of critical mathematics education Part 2 comments on mathematics in action and considers the discussion of mathematics as an applied discipline in the contexts of technology management engineering economics etc In Part 3 the book comments on mathematics and science in general These comments are then generalised into a discussion of reason and of the apparatus of reason Finally Part 4 returns to the discussion of mathematics education and comments on notions that could become sensitive to the critical position of mathematics education Ole Skovsmose is also travelling between different academic fields He touches upon mathematics and mathematics education the philosophy of mathematics technology and science as well as sociological issues glancing over issues such as globalisation ghettoising learning society and risk society Travelling with the author the reader will become aware of connections between many of these different issues
