dress that took place in Europe and America in the latter half of the 18th century and the first decade of the 20th century and the types of garments adopted by women to overcome the challenges posed by fashionable dress. It considers the many advocates for reform and examines their motives, their arguments for change, and how they promoted improvements in women's fashion. Though there was no single overarching dress reform movement, it reveals similarities among the arguments posed by diverse groups of reformers, including especially the equation of reform with an ideal image of improved health. Drawing on a variety of primary and secondary sources in the USA and Europe, including the popular press, advice books for women, allopathic and alternative medical literature, and books on aesthetics, art, health, and physical education, the text makes a significant contribution to costume studies, social history, and women's studies.

Child Creativity and the Visual Arts: From Secessionist Vienna to Postwar America Megan Brandow-Faller, 2025-07-24

Tracing the dissemination of Secessionist ideas of child creativity from their origination in early 20th century Vienna through to their eventual commodification in postwar America, this book highlights the central role that visual art has played in child education and in nurturing creativity in elementary and preschool curricula. Taking the reader through the ideas of three artistic visionaries and their students, Franz Ci ek and Austrian American migr s Emmy Zweybr ck and Viktor L wenfeld, this book reveals how these ideas developed in postwar America through a focus on child-centered methods of learning by doing in artistic practice. By centring the visual arts as a vital educational medium, we see how these teachings have been popularized as a means of nurturing creativity in childhood. Across three chapter-length case studies interspersed with three mini-chapters on the reception of each artist-educator's radical teachings in the American education system, *Child Creativity and the Visual Arts* provides new interpretations into the impact of these three luminaries, differing philosophies, on a broader program of socio-political activism in the USA. Drawing on previously untapped archival and primary source materials, it blends deep material culture analysis with narrative elements to present a compelling account of the unrecognized influence of migr art pedagogy on progressive international art education. In doing so, it provides fresh transregional and thematic perspectives on early 1900s Vienna as a hotbed of creative and cultural experimentation and mecca of progressive art education.
