Readings in Art History: The Renaissance to the present Harold Spencer,1982 Undergraduate Research in Art Vaughan Judge,Jenny Olin Shanahan,Gregory Young,2018-12-07 Undergraduate Research in Art A Guide for Students supplies tools for scaffolding research skills with examples of undergraduate research activities and case studies on projects in the various areas of the study of art from art history art education and fine art therapy to studio art graphic design and digital media Although art degree programs don t always call it research many undergraduate activities in art have components that could be combined into comprehensive projects The book begins with an overview chapter followed by seven chapters on research skills including literature reviews choosing topics formulating questions citing sources disseminating results and working with data and human subjects A wide variety of subdisciplines follow in Chapters 9 through 18 with sample project ideas from each as well as undergraduate research conference abstracts The final chapter is an annotated guide to online resources that students can access and readily operate Each chapter opens with inspiring quotations and wraps up with applicable discussion questions Professors and students can use Undergraduate Research in Art as a text or a reference book **Viewpoints** Mary Strong,Laena Wilder,2009-05-01 Early in its history anthropology was a visual as well as verbal discipline But as time passed visually oriented professionals became a minority among their colleagues and most anthropologists used written words rather than audiovisual modes as their professional means of communication Today however contemporary electronic and interactive media once more place visual anthropologists and anthropologically oriented artists within the mainstream Digital media small sized and easy to use equipment and the Internet with its interactive and public forum websites democratize roles once relegated to highly trained professionals alone However having access to a good set of tools does not guarantee accurate and reliable work Visual anthropology involves much more than media alone This book presents visual anthropology as a work in progress open to the myriad innovations that the new audiovisual communications technologies bring to the field It is intended to aid in contextualizing explaining and humanizing the storehouse of visual knowledge that university students and general readers now encounter and to help inform them about how these new media tools can be used for intellectually and socially beneficial purposes Concentrating on documentary photography and ethnographic film as well as lesser known areas of study and presentation including dance painting architecture archaeology and primate research the book s fifteen contributors feature populations living on all of the

world's continents as well as within the United States. The final chapter gives readers practical advice about how to use the most current digital and interactive technologies to present research findings.

Art history Michael Hatt, Charlotte Klunk, 2025-03-18. *Art History: A critical introduction to its methods* provides a lively and stimulating introduction to methodological debates within art history. Offering a lucid account of approaches from Hegel to post-colonialism, the book provides a sense of art history's own history as a discipline from its emergence in the late eighteenth century to contemporary debates. By explaining the underlying philosophical and political assumptions behind each method along with clear examples of how these are brought to bear on visual and historical analysis, the authors show that an adherence to a certain method is in effect a commitment to a set of beliefs and values. The book makes a strong case for the vitality of the discipline and its methodological centrality to new fields such as visual culture. This book will be of enormous value to undergraduate and graduate students and also makes its own contributions to ongoing scholarly debates about theory and method.

[Theory for Art History](#) Jae Emerling, 2019-06-06. *Theory for Art History* provides a concise and clear introduction to key contemporary theorists including their lives, major works, and transformative ideas. Written to reveal the vital connections between art history, aesthetics, and contemporary philosophy, this expanded second edition presents new ways for rethinking the methodologies and theories of art and art history. The book comprises a complete revision of each theorist, updated and trustworthy bibliographies on each, an informative introduction about the reception of critical theory within art history, and a beautifully written original essay on the state of art history and theory that serves as an afterword. From Marx to Deleuze, from Arendt to Rancière, *Theory for Art History* is designed for use by undergraduate students in courses on the theory and methodology of art history, graduate students seeking an introduction to critical theory that will prepare them to engage the primary sources, and advanced scholars in art history and visual culture studies who are themselves interested in how these perspectives inflect art historical practice. Adapted from *Theory for Religious Studies* by William E. Deal and Timothy K. Beal.

Readings in Discipline-based Art Education Ralph Alexander Smith, 2000. This sourcebook includes 42 chapters by prominent art educators, scholars, practitioners, and researchers. The reader will find an array of DBAE ideas and practice guides on artistic and aesthetic development, preservice and inservice for teachers, staff development, and teacher preparation. Chapters examine the functions of museums and the evaluation of museum education programs, learning outcomes, teaching art history, types of art criticism, issues of gender and multiculturalism, and the relationship of art education and postmodernism. <http://www.naea-reston.org/publications/list.html>
