Hamelink,2020-05-29 This book provides a robust conceptualization of peace Hamelink defines peace as conceived of moments of celebrating human togetherness with deep fractures that polarize society standing in the way of collectively celebrating togetherness and posing a serious existential risk to humanity Deep dialogue is the form of human cooperative communication that is needed to build

communities that can overcome polarization This is the most difficult form of human conversation as it is based upon trust mutuality patience and freedom and requires safe non threatening spaces but this book explains how to overcome the essential obstacles that prevent this dialogue To curate a deep dialogue we must turn to humanity s unique resource our ability to communicate pro socially and cooperatively

**Framing War and Genocide** Gregory Kent,2006

Although just a decade ago the destruction of a European state and society through war and genocide remains one of the worst global crises of the post Cold War era with reverberations still felt today Bombardment and sieges of major towns and cities concentration and death camps and the mass slaughter and expulsion of civilians were all characteristics of a type of warfare that Europe had never dreamed might return The war against Bosnia had a major impact on European and wider global consciousness being as it was then the most reported debated and analyzed conflict to date But despite the extensive coverage of Bosnia the author contends the conflict and its origins were certainly misunderstood there being a significant gulf between media perspectives and the thrust of academic discourse This multidisciplinary book is based on extensive research into the TV and newspaper framing of the war during the critical early period of its development Uniquely the analysis of media is underpinned by an extensive and detailed historical argument about the nature of the wars and the politics of the Federation including the use of media in war making strategies in Yugoslavia itself It will be of interest to scholars of IR and politics media communication and journalism studies and war and genocide studies Journalists and the

general reader will find the book accessible with valuable insights into reporting war and understanding media representation of conflict Key issues and questions addressed include the critical use of official sources and propaganda in journalism how media and policymakers interact to define and frame problems for policy action what factors limit the accurate reporting of war what is genocide and how is the Genocide Convention relevant in practice and how to report genocide when such coverage conflicts with state interests **British Books** ,1916 **Handbook of War Studies II** Manus I.
