The Scope Of Philosophy

Edith Henry Johnson

The Scope Of Philosophy:

The Scope of Philosophy John Young, 2010 Can we have certainty Is the universe due to chance or is it designed Does God exist Has each of us a soul that survives after death Are there unchanging moral laws by which we should live This book examines these and many other questions from the standpoint of reason It draws on the wisdom of the past and especially the perennial philosophy of which St Thomas Aquinas is the greatest representative using these insights to discuss topics affecting us all A lucid picture is presented of the philosophies which have followed each other through the centuries down to current postmodernism Their main features are critically examined and their implications for life and thought are considered giving the reader a means to critique modern civilization John Young maintains that clarity and certainty about fundamental realities may be achieved through the exercise of human reason His exposition is clear while never oversimplifying the issues and can be followed by the average person with careful and thoughtful reading It will be of special value to students engaged in tertiary studies True philosophy Young argues arises from an innate power of reasoning accessible to everyone which it clarifies and deepens bringing a formation of mind achievable in no other way and a unique insight into the greatest realities A sound grounding in realist philosophy is urgently needed today when confusion abounds Here is an excellent guide to the essentials and unity of the subject clearly and simply written John Young a graduate of the Aquinas Academy in Sydney Australia has taught philosophy in four seminaries and to adult education groups He has published hundreds of articles on philosophy theology and economics and is the author of the books Reasoning Things Out Catholic Thinking and The Natural Economy *The Scope of Philosophy* Francis William Garforth, 1971 **The Westminster Review**, 1902 **The Writings of John Fiske ...** John Fiske, 1902 [The Miscellaneous Writings of John Fiske](#) John Fiske, 1902 [The Argument of Aristotle's Metaphysics](#) Edith Henry Johnson, 1906 The Argument of Aristotle's Metaphysics by Edith Henry Johnson first published in 1906 is a rare manuscript the original residing in one of the great libraries of the world This book is a reproduction of that original which has been scanned and cleaned by state of the art publishing tools for better readability and enhanced appreciation Restoration Editors mission is to bring long out of print manuscripts back to life Some smudges annotations or unclear text may still exist due to permanent damage to the original work We believe the literary significance of the text justifies offering this reproduction allowing a new generation to appreciate it *Aquinas* F. Copleston, 1991-07-25 Aquinas 1224-74 lived at a time when the Christian West was opening up to a wealth of Greek and Islamic philosophical speculation An embodiment of the thirteenth century ideal of a unified interpretation of reality in which philosophy and theology work together in harmony Aquinas was remarkable for the way in which he used and developed this legacy of ancient thought an achievement which led his contemporaries to regard him as an advanced thinker Father Copleston's lucid and stimulating book examines this extraordinary man whose influence is perhaps greater today than in his own lifetime and his thought relating his ideas wherever possible to problems as they are discussed today **The Expositor**, 1913 **The**
