Geography teachers and school library media specialists will find this resource indispensable for

providing classroom lessons and activities in critical thinking for geography students in grades 7-12. It is filled with over 75 primary source Internet sites covering such topics as Places and Regions, Physical Systems, Human Systems, Environment and Society, and the Uses of Geography, and will be an invaluable tool in helping teachers and librarians meet the standards set forth in the 1994 publication *Geography for Life: National Geography Standards*. Each site is accompanied by a site summary that describes the site contents and usefulness to geography teachers and school library media specialists. Site subjects include Urban Landscapes, Volcanoes and Earthquakes, Weather, The U.S. Census, and the World Wildlife Fund Global Network. The questions and activities that follow are designed to develop critical thinking skills for both oral and written presentations. An appendix of additional geography resources includes Internet addresses for approximately 25 sites relating to maps, primary sources, and critical thinking. Using Internet Primary Sources to Teach Critical Thinking Skills in Government, Economics, and Contemporary World Issues, James M. Shiveley, Phillip J. VanFossen, 2001-09-30. Teachers of political science, social studies, and economics, as well as school library media specialists, will find this resource invaluable for incorporating the Internet into their classroom lessons. Over 150 primary source Web sites are referenced and paired with questions and activities designed to encourage critical thinking skills. Completing the activities for the lessons in this book will allow students to evaluate the source of information, the content presented, and its usefulness in the context of their assignments. Along with each Web site, a summary of the site's contents identifies important primary source documents such as constitutions, treaties, speeches, court cases, statistics, and other official documents. The questions and activities invite the students to log on to the Web site, read the information presented, interact with the data, and analyze it critically to answer such questions as: Who created this document? Is the source reliable? How is the information useful, and how does it relate to present-day circumstances? If I were in this situation, would I have responded the same way as the person in charge? Strengthening these critical thinking skills will help prepare students for both college and career in the 21st century.
