Herds Stephen Martin Fritz, 2020-09-04 Our Human Herds presents a new theory in moral and political philosophy called dual morality The theory proposes that just as the physical senses of sight smell taste touch and hearing evolved to help us navigate our physical environment two independent moral senses evolved to guide us to success in our social world One prioritizes cooperation the other competition The first bases moral justification on the egalitarianism that emphasizes our equal worth the other finds moral justification in the inequalities that allow us to distinguish better from worse Liberal and conservative are merely the names given to the political manifestations of these two forms of moral expression just as socialist and capitalist describe their economic manifestations and personality and character their psychological ones Our Human Herds addresses what it means to be a human being why we fight about the things that divide us and why we unite behind the ideas that draw us together The book examines all aspects of human social behavior revealing how and why we often disagree in our approaches to education history war crime pleasure happiness politics science and religion This is a learned thoroughly researched study and dazzlingly bright The effervescent approach to writing makes its pages fly by Studies as brilliant as this one deserve a far wider audience An engrossing and mind expanding examination of morality Kirkus Reviews Book Review A vast philosophical study charts the shifting moral landscape while tackling the weightiest question of human existence what is the meaning of life Humanity s moral framework remains in a constant state of reconstruction As the author points out in his opening chapter Two hundred years ago if a woman was raped and became pregnant we d kill the rapist and spare the baby Today we spare rapist and kill the baby Centuries ago many cultures condoned polygamy today we put people in jail for it Over the course of this weighty tome which is just shy of 1 000 pages the author ponders what morality is with an emphasis on humans as grouping or herding creatures and the causes of its flux and reflux Furthermore there is an attempt to reconcile opposing philosophical theories by introducing a new conceptual model called Dual Morality proposed as an all encompassing blueprint of human morality The study is logically structured divided into four sections The Theory of Dual Moralism The Explanation including investigations of the group and the self The Derivations which considers family country religion and science nature technology and finally The Extrapolations a far reaching look at everything from pleasure and happiness to suicide murder and abortion The author possesses the rare skill of being able to explore himself with an enviable ease drawing on palatable references to popular culture For example Comedian Woody Allen said he laughs at his own jokes when they first come to him because humor originates in the unconscious When his conscious mind hears them for the first time it is as if they came from another place and so we are in a way an audience to our own humor This approach applied throughout makes complex ideas not only accessible but entertaining and enjoyable as well The result is far from the predictable dry academic thesis This is a learned thoroughly researched study and dazzlingly bright The effervescent approach to writing makes its 951 pages fly by Fritz s dedication is to that miniscule fragment of humanity who read books like this Studies as brilliant as this one deserve a far wider audience
