Yellowstone Run:

A Cow's Life Monte Montgomery, 2009-05-26 Millions of people from nature lovers to collectors of cow memorabilia are enamored of cows yet few have any inkling of the fascinating history of arguably the animal most crucial to the survival and advancement of human civilization Our close relationship with cows goes back eight thousand years to the revolutionary advent of domestication in Mesopotamia and the Indus River valley Since then humans have relied on cows for milk meat and muscle M R Montgomery's own keen interest in cows began on his cousin's Montana cattle ranch He traces their history from the formidable long extinct Auroch the 6 000 pound ancestor of all cattle on Earth to the ancient cattle roads and drives in England to the selective mixing practiced by British cattlemen well before Charles Darwin or Gregor Mendel He charts the origin of breeds and relates the path by which the Aberdeen Angus has today become the king of cows With a sympathetic eye for detail born of his own experience he chronicles the day to day life of cattle and their keepers from encouraging good mothering skills to rooting out genetic disease in a herd After experiencing Montgomery's bovine fascination even cow lovers will have new appreciation for the objects of their affection
