**State Failure, Collapse & Reconstruction** Jennifer Milliken,2003-08-29 State collapse in such places as Yugoslavia has led to widespread human suffering and regional instability This collection situates state failure and collapse against the backdrop of the emergence consolidation expansion and erosion of the Western state system *State Failure and State Weakness in a Time of Terror* Robert I. Rotberg,2004-05-13 The threat of terror which flares in Africa and Indonesia has given the problem of failed states an unprecedented immediacy and importance In the past failure had a primarily humanitarian dimension with fewer implications for peace and security Now nation states that fail or may do so pose dangers to themselves to their neighbors and to people around the globe preventing their failure and reviving those that do fail has become a strategic as well as a moral imperative *State Failure and State Weakness in a Time of Terror* develops an innovative theory of state failure that classifies and categorizes states along a continuum from weak to failed to collapsed By understanding the mechanisms and identifying the tell tale indicators of state failure it is possible to develop strategies to arrest the fatal slide from weakness to collapse This state failure paradigm is illustrated through detailed case studies of states that have failed and collapsed the Democratic Republic of the Congo Sierra Leone the Sudan Somalia states that are dangerously weak Colombia Indonesia Sri Lanka Tajikistan and states that are weak but safe Fiji Haiti Lebanon State Legitimacy and Failure in International Law Mario Silva,2014-02-06 Failing states share characteristics of inadequate structural competency including inter alia the inability to advance human welfare and security Economic inequalities and corruption are present as well as a loss of legitimacy and reduced social cohesion Failure of rule of law is manifested in areas of judicial adjudication security reduced territorial control and systemic political instability The international community often confronts these challenges in a manner that actually complicates issues further through lack of consensus among state actors Consequently a new and emerging concept of sovereignty requires review in terms of the postmodern state Through scholarly consideration *State Legitimacy and Failure in International Law* evaluates gaps in structural competency that precipitate state failure and examines the resulting consequences for the world community **Post-War Regimes and State Reconstruction in Liberia and Sierra Leone** Amadu Sesay,Charles Ukeje,2009-10-15 The shocks of the unexpected outbreak of violent internal armed conflicts in post Cold War West Africa continue to linger in policy and academic circles While considerable attention is devoted to explaining the civil wars there is little understanding of the delicate and unpredictable processes of reconstruction Post war reconstruction programmes in Africa have become by and large externally driven processes and while externalisation may not be negative per se it is important to interrogate how such intervention recognises and interacts with local dynamics and how it manipulates and conditions the outcomes of post conflict reconstruction agenda Investigating the interface between power elite the nature of post war regimes and the pattern which post war reconstruction takes is important both for theory and practice This original study by some of West

Africa's leading scholars interrogate post-war reconstruction processes in the twin West African countries of Liberia and Sierra Leone focusing on the effects of regime types on the nature, scope, success or failure of their post-war reconstruction efforts. Political scientists, diplomats, the international community, donor and humanitarian agencies, advocacy groups, the United Nations and its agencies would find it an important resource in dealing with countries emerging from protracted violence and civil war. *Conflict, Peace, Security and Development* Helen Hintjens, Dubravka Zarkov, 2014-08-13. Whilst classical approaches linked development with peace, security has become central to understandings of both war and peacetime. This book uniquely reflects on how to deal with the convergence of war and peace in the context of global economic and geo-political development. It addresses methodological challenges in contemporary approaches to conflict, violence, security, peace and development. Two dominant contemporary approaches are selected for debate on methodologies and ethical choices: rational choice and identity-based theorizing. The chapters are arranged as dialogues around contending approaches to better understand how the interlocking fields of violent conflict, peace, development and security can be researched and understood. The book considers how theoretical and methodological approaches relate to different ethical and political choices, including around engagement and intervention in the four interwoven fields. Theoretical, methodological and ethical issues emerge from the critical reviews of academic discourses and case study-based chapters from across the world, including Sri Lanka, Ghana, Colombia and Rwanda. This book is an invaluable resource for postgraduate students and researchers in Development Studies, Conflict Studies, Peace Studies and Security Studies. *Special Issue*, 2002.

*Routledge Handbook of International Statebuilding* David Chandler, Timothy D. Sisk, 2013-09-02. This new Handbook offers a combination of theoretical, thematic and empirical analyses of the statebuilding regime, written by leading international scholars. Over the past decade, international statebuilding has become one of the most important and least understood areas of international policy-making. Today there are around one billion people living in some 50-60 conflict-affected, fragile states vulnerable to political violence and civil war. The international community grapples with the core challenges and dilemmas of using outside force, aid and persuasion to build states in the wake of conflict and to prevent such countries from lapsing into devastating violence. The *Routledge Handbook of International Statebuilding* is a comprehensive resource for this emerging area in International Relations. The volume is designed to guide the reader through the background and development of international statebuilding as a policy area, as well as exploring in depth significant issues such as security, development, democracy and human rights. Divided into three main parts, this Handbook provides a single source overview of the key topics in international statebuilding: Part One: Concepts and Approaches; Part Two: Security, Development and Democracy; Part Three: Policy Implementation. This Handbook will be essential reading for students of statebuilding, humanitarian intervention, peacebuilding, development, war and conflict studies, and IR. Security Studies in general. **Handbook of Ethnic Conflict** Dan Landis, Rosita D. Albert, 2012-02-14. Although group conflict is hardly new

the last decade has seen a proliferation of conflicts engaging intrastate ethnic groups. It is estimated that two thirds of violent conflicts being fought each year in every part of the globe including North America are ethnic conflicts. Unlike traditional warfare civilians comprise more than 80 percent of the casualties and the economic and psychological impact on survivors is often so devastating that some experts believe that ethnic conflict is the most destabilizing force in the post Cold War world. Although these conflicts also have political economic and other causes the purpose of this volume is to develop a psychological understanding of ethnic warfare. More specifically *Handbook of Ethnopolitical Conflict* explores the function of ethnic religious and national identities in intergroup conflict. In addition it features recommendations for policy makers with the intention to reduce or ameliorate the occurrences and consequences of these conflicts worldwide. [Troubled Regions and Failing States](#) Kristian Berg Harpviken, 2010-07-07 Is the phenomenon of state failure better understood through a focus on the regional context? To what extent may studies of regional security benefit from a focus on the capacities and vulnerabilities of the states involved? This title addresses these questions. **Intervention and State-Building in the Pacific** Greg Fry, Tarcisius Tara Kabutaulaka, 2008-10-15 *Intervention and State Building in the Pacific* explores state building intervention in weak war torn or failing states through a critical examination of a new model that has recently emerged in relation to the Pacific arc of crisis. Initiated by the Australian Government in 2003 this cooperative intervention doctrine built on declared principles of partnership and respect for sovereignty seems to offer a legitimate way to engage in state building intervention. Drawing on a group of distinguished Pacific specialists this book mounts a critique of these claims showing how international legitimacy does not automatically translate into political legitimacy among those in the affected societies and how the attempt to legitimize the intervention internationally may actually work against such legitimacy in the recipient state. *When States Fail* Robert I. Rotberg, 2010-07-28 Since 1990 more than 10 million people have been killed in the civil wars of failed states and hundreds of millions more have been deprived of fundamental rights. The threat of terrorism has only heightened the problem posed by failed states. *When States Fail* is the first book to examine how and why states decay and what if anything can be done to prevent them from collapsing. It defines and categorizes strong weak failing and collapsed nation states according to political social and economic criteria. And it offers a comprehensive recipe for their reconstruction. The book comprises fourteen essays by leading scholars and practitioners who help structure this disparate field of research provide useful empirical descriptions and offer policy recommendations. Robert Rotberg's substantial opening chapter sets out a theory and taxonomy of state failure. It is followed by two sets of chapters the first on the nature and correlates of failure the second on methods of preventing state failure and reconstructing those states that do fail. Economic jump starting legal refurbishing elections the demobilizing of ex combatants and civil society are among the many topics discussed. All of the essays are previously unpublished. In addition to Rotberg the contributors include David Carment Christopher Clapham Nat J Colletta Jeffrey Herbst Nelson Kasfir Michael T Klare Markus Kostner Terrence Lyons Jens

Meierhenrich Daniel N Posner Susan Rose Ackerman Donald R Snodgrass Nicolas van de Walle Jennifer A Widner and Ingo Wiederhofer The Tragedy of Failure Tiffany O. Howard, 2010-04-21 This intriguing approach to international conflict seeks to facilitate a dialogue between academics and policymakers on how to better anticipate and prevent state failure subsequent forced migration and the terrorist threat that often results. Despite the far reaching implications of state failure little research has been devoted to its consequences. Postulating that failed and failing states enable the existence of terrorist organizations The Tragedy of Failure: Evaluating State Failure and Its Impact on the Spread of Refugees, Terrorism and War bridges that gap. Both descriptive and prescriptive the book offers a nuanced examination of the relationship between forced migration, state failure and terrorism. The author suggests policy strategies that are capable of anticipating the onset of forced migration situations before they develop into crises and presents quantitative forecasting models with the ability to predict the occurrence of state failure and forced migration as much as two years in advance. Buoyed by this work and the tools it offers policymakers can focus more closely on the issue of failed states and the movement of refugees and internally displaced persons in the interest of targeting and eliminating dangerous terrorist organizations. *State Failure, Collapse and Reconstruction* Jennifer Milliken, 2002 From Fragile State to Functioning State Sabine Collmer, 2009 The phenomenon of state fragility has become a mounting concern to the international community in the last decades. This edited volume consists of a compilation of articles that evaluates how countries may recover and return to a path of stable and democratic development. In its 17 chapters the contributors analyze the difficult transformation processes of four countries: Afghanistan, Georgia, Kosovo and Moldova. The authors tackle theoretical approaches to state reform as well as country specific issues like the role of external actors, security sector reform and anti corruption strategies. **State Reconstruction in West Africa** 'Segun Jegede, Ayodele Ale, Eni Akinsola, 2001 **Strategic Studies Quarterly**, 2009 Journal of International Affairs, 2004 *State Collapse and Reconstruction in the Periphery* Jens Stilhoff Sörensen, 2019-05-01 In the 1990s Yugoslavia which had once been a role model for development became a symbol for state collapse, external intervention and post war reconstruction. Today the region has two international protectorates, contested states and borders, severe ethnic polarization and minority concerns. In this first in depth critical analysis of international administration aid and reconstruction policies in Kosovo Jens Stilhoff Sörensen argues that the region must be analyzed as a whole and that the process of state collapse and recent changes in aid policy must be interpreted in connection to the wider transformation of the global political economy and world order. He examines the shifting inter and intracommunity relations, the emergence of a political economy of conflict and of informal clientelist arrangements in Serbia and Kosovo and provides a framework for interpreting the collapse of the Yugoslav state, the emergence of ethnic conflict and shadow economies and the character of western aid and intervention. Western governments and agencies have built policies on conceptions and assumptions for which there is no genuine historical or contemporary economic, social or political basis in the region. As the

author persuasively argues this discrepancy has exacerbated and cemented problems in the region and provided further complications that are likely to remain for years to come International Territorial Administration Ralph Wilde, 2008 The book is the first comprehensive treatment of the reasons why international organizations have engaged in territorial administration from the League of Nations in Danzig during the inter war period to the UN in East Timor recently and Kosovo today Moving beyond the fashionable and misleading use of terms like post conflict reconstruction and state building to describe the role of international territorial administration this book engages in a complex analysis of the various purposes with which this activity has been associated some of which for example settling disputes over sovereignty have nothing to do with perceived local incapacities for governance The book goes beyond territorial administration by the UN covering the conduct of this activity by international organizations generally thereby analyzing lesser known projects like the EU Administration in Mostar 1994 6 It addresses instances of partial as well as plenary administration such as the role of the Office of the High Representative in imposing legislation in Bosnia and Herzegovina since 1996 By revealing the complex and diverse range of objectives which international organizations have attempted to realize through territorial administration and establishing the commonalities and differences between the administration projects in this respect the book establishes the contours of an international policy institution to rank alongside peacekeeping and humanitarian intervention By doing so it provides a framework through which some of the key questions relating to such projects concerning legitimacy authority and applicable law can be addressed It also reveals a secret history of international organizations throughout the 20th Century complementing work on their role in managing relations between states by exposing their role within particular states and non state territories beyond the well documented activity of peacekeeping by military forces **A Wiser Century?** Thomas Giegerich, 2009 The Hague Peace Conferences of 1899 and 1907 dealt with three interlinked topics the peaceful settlement of disputes including by arbitration the restriction of armaments and military budgets the laws of war The first two were aimed at preventing the outbreak of war not by restricting the jus ad bellum in its substance but by inducing states not to use their continuing war power and to limit the growth of their war machinery The third topic was concerned with containing the brutality of war where its prevention had failed Whereas the Conferences succeeded in codifying the laws of war they made less progress with regard to the peaceful settlement of disputes and failed on limiting armaments Worst of all they could not prevent the outbreak of World War I This volume uses the occasion of the 100th anniversary of the Second Hague Peace Conference to follow up on the then concerns and objectives looking at the Hague legacy through the lens of today's problems The 27 contributions treat the most pressing recent issues of non proliferation and disarmament international humanitarian law and judicial dispute settlement Three questions run like a thread through this volume 1 In which areas have the promises of 1899 and 1907 remained unfulfilled and why 2 In which areas has there been progress in which other areas perhaps regression 3 What are our prospects and how can we international lawyers help shaping a promising future in

respect of the prevention and containment of war Whereas the empire of law in international relations and the age of international justice which were envisaged in the Convention for the Pacific Settlement of International Disputes of 1899 1907 have not yet arrived on the global level we Europeans have made considerable progress since 1945 But in the age of globalization Europe cannot for long remain an Isle of the Blest Together with the other peoples of the United Nations we must therefore strive toward fulfilling the promises of the UN Charter and the Universal Declaration of Human Rights peace justice freedom and prosperity for everyone and all nations large and small Only then can wars be prevented
