Practice-Based Research in Social Work Sarah-Jane Dodd, Irwin Epstein, 2012-03-12 This unique textbook explores practice based research PBR using numerous practice examples to actively encourage and engage students and practitioners to embrace research as a meaningful support for their practice Whilst evidence based practice gives practitioners access to information about universal best practices it does not prioritize practitioner generated knowledge or promote new research based interventions relevant to their own practice circumstances as PBR does This book discusses the evolution of PBR as a distinct social work research approach describes its principles and methods and presents a range of exemplars illustrating the application of PBR within different practice methods in different practice settings The chapters cover Identifying the research question in a PBR model Designing a study and identifying a methodology Sampling Literature reviews Gathering data Ethics Analyzing data and interpreting results Putting research into practice Viewing the practitioner as central to the research process and research as a necessary component of practice this invaluable book emphasizes the seamless integration of practice and research It is about research in social work practice rather than research on social work practice Each chapter includes an overview an introduction and a key concepts summary Practice Based Research in Social Work is a very accessible text suitable for social work students particularly MSW students and practitioners
