

An international scoping review focused on gifted and talented children: Early identification and inclusive education

Fanny Messberg¹, Johanna Lundqvist², Louise Sund³

Abstract: Gifted and talented children should be identified at an early stage and provided with opportunities to thrive, flourish, and develop in inclusive education. Inclusive education refers to a sense of belonging, and development to one's fullest, including talent development. This international scoping review aims to investigate contextual and environmental factors contributing to well-functioning inclusive education, with a particular focus on early identification of gifted and talented children. The Bioecological model for human development and the Differentiating Model of Giftedness and Talent constituted the framework. Twenty-three (N=23) research articles were included and two thematic analyses were conducted. Regarding early identification, five influential factors (i.e., themes) were created: Knowledge about giftedness and talent; Opportunities for all children to demonstrate their abilities; Identification strategies; Collaborations; and Teacher education and professional development. Regarding well-functioning inclusive education, five factors (i.e., themes) were created, which, in addition to early identification, will also play a role: those were: Policies recognizing inclusion and gifted and talented children; Appreciation of diversity; Additional educational provisions; Peer interactions and learning; and Home-school partnership. A factor model for early identification and well-functioning inclusive education targeting giftedness and talent is presented, and suggestions for practitioners and further research are provided.

Inclusive Education and Early Identification

Inclusive education is an appreciation of diversity, where all children obtain a sense of belonging and are able to develop to their fullest (Lundqvist, 2018; Sandall et al., 2019; Tirri & Laine, 2017). Therefore, inclusive education is about children who thrive and flourish, and have opportunities to develop further, together with peers. Thriving covers a child's sense of belonging and psychological well-being, whereas flourishing refers to developing to one's fullest and having the opportunity to contribute to the greater good of society (Saylor, 2009; Sternberg, 2023).
