## 1 General introduction

The rapid advancement of digital technology has profoundly influenced how individuals access and use information, creating unprecedented opportunities in education. In particular, the COVID-19 pandemic has catalyzed a global wave of educational reform, compelling schools to transfer most of their teaching and learning activities online in a short period of time. This shift has intensified the focus among educators and researchers on leveraging technological tools to enhance teaching and learning outcomes (Carrillo and Flores 2020; Zhang and Zou 2022). In the domain of language education, this issue takes on particular significance. Given the inherently interactive nature of language as a dynamic system for conveying meaning (Garrett 1991), teaching practices should leverage technological tools to foster meaningful communication and engagement. However, research shows that many teachers may lack systematic guidance to cope with such rapid technological changes (Fernández-Batanero et al. 2022), which, in turn, may influence teaching effectiveness and further affect students' learning experiences.

In response to the challenges and opportunities identified above, the book *Technology and English Language Teaching in a Changing World: A Practical Guide for Teachers and Teacher Educators*, edited by Ju Seong Lee et al. (2024) was published by Palgrave Macmillan. Designed as a practical guide, this book delivers a comprehensive exploration of technology-assisted language teaching and learning, with a focus on both receptive and productive English language skills. By presenting examples of technology integration in global educational contexts, it provides teachers and teacher educators with practical strategies to enhance the quality and effectiveness of English instruction.
