impact lives far beyond the classroom *Teacher Personal Theorizing* Gail MacCutcheon,1992-01-01 This book examines the relationship between teacher theorizing and teacher action as illustrated by the curricular and instructional practices of teachers The authors show that all teaching is guided by theory developed by the teachers Teachers could not begin to practice without some knowledge of the context of their practice and without ideas about what can and should be done in those circumstances In this sense teachers are guided by personal practical theories that structure their activities and guide them in making decisions This literature is very significant in explaining and interpreting many phenomena of schooling such as why teachers alter curriculum documents and other policies how inservice education can be improved how supervisors can help teachers to improve their practices and how administrators can become leaders to improve education This perspective has broad and specific implications for every facet of education Those interested in teacher education and development in supervision in curriculum and in administration will find it especially relevant Knowing, Becoming, Doing as Teacher Educators Stefinee E. with many of the students who recall that special teacher who challenged them to find their hidden talent motivated them to push a little harder or to simply surpass their own expectations For the Love of Teachers is a special way of saying thanks to all the teachers who've sacrificed their time to better the lives of others *Research on Teacher Thinking* James Calderhead, Christopher Day, Pam Denicolo, 2012 This is a companion volume to the editors Insights into Teachers Thinking and Practice Falmer Press 1999 and seeks to carry the discussion on further illustrating that there is a continuing intensity of thought activity and debate on how to conceptualise research on teacher thinking and thus generate knowledge for further understanding and action The ethical questions on undertaking research on the inner lives of teachers remain unresolved The international team present chapters which investigate the relationship between the researcher and the researched and the relevance and role of research in teacher development The papers are not presented as best practice for such definitions would be inevitably value laden Rather they are indications and anticipations of key areas for the development of understanding of teachers thinking and actions in the 1990s *The Practical Teacher*, 1885
