Leonardo, 2000 International journal of contemporary visual artists **Architextiles** Mark Garcia, 2006 Focusing on the intersections between textiles and architectural design this title communicates the full range of possibilities for a multidisciplinary design hybrid It examines the generative concepts forms patterns materials processes technologies and practices that are driving this cross fertilisation in contemporary urban and architectural design Architextiles represent a transition stage in the reorientation of spatial design towards a more networked dynamic interactive communicative and multifunctional state The paradigms of fashion and textile design with their unique accelerated aesthetics and ability to embody a burgeoning composite and complex range of properties such as lightness flow flexibility surface complexity and movement have a natural affinity with architecture's shifts towards a more liquid state The preoccupation with textiles in architecture challenges traditional perceptions and practices in interior architectural urban textile and fashion design
