*the Future of Work* Paul S. Adler,1992 This book brings together a set of essays exploring the implications of new technologies in the workplace The common premise of the contributions is that the effective implementation of automation in manufacturing and engineering operations will typically require a workforce with a higher skill profile Examining the experience of countries in Europe Australia Asia and the U S the book analyzes four themes the new competencies required for effective implementation of new technologies how firms can develop these new competencies the implications of these changes for industrial relations and how firms can weave together business strategy technology strategy and personnel strategy to build competitive advantage with greater rather than lesser skills This argument contradicts the conventional assumption that automation will not only reduce the number of workers required to produce a given product but also require less skilled workers to do so Technology and the Future of the U.S. Construction Industry United States. Congress. Office of Technology Assessment. Panel on Technical Change and the U.S. Building Construction Industry,1986 Technology and the Future of Work Roosevelt Institute,2015 The changing nature of work in the 21st century and the widening gap in income has led to a vibrant debate about the role of technology in shaping future labor markets and overall economic well being For at least a decade the debate had two clear sides a that technology inevitably drives the polarization of the labor market and growing income inequality and b that the hollowing out of American jobs is the result of a host of policies that have put downward pressure on wage growth and job creation Recently we have seen a more balanced view emerge technology alongside poor policy choices has played and could well continue to play a significant role in reducing both the political and workplace power of American workers U S Programs Future of Work inquiry commissioned the Roosevelt Institute to examine major perspectives on the role of technology in shaping the future of work In *Technology and the Future of Work* The State of the Debate the Roosevelt Institute offers a comprehensive nuanced and timely overview of the current literature

**Gender, Technology, and the Future of Work** Mariya Brussevich, Ms. Era Dabla-Norris, Christine Kamunge, Pooja Karnane, Salma Khalid, Ms. Kalpana Kochhar, 2018-10-08

New technologies digitalization artificial intelligence and machine learning are changing the way work gets done at an unprecedented rate Helping people adapt to a fast changing world of work and ameliorating its deleterious impacts will be the defining challenge of our time What are the gender implications of this changing nature of work How vulnerable are women s jobs to risk of displacement by technology What policies are needed to ensure that technological change supports a closing and not a widening of gender gaps This SDN finds that women on average perform more routine tasks than men across all sectors and occupations tasks that are most prone to automation Given the current state of technology we estimate that 26 million female jobs in 30 countries 28 OECD member countries Cyprus and Singapore are at a high risk of being displaced by technology i e facing higher than 70 percent likelihood of being automated within the next two decades Female workers face a higher risk of automation compared to male workers 11 percent of the female workforce relative to 9 percent of the male workforce albeit with significant heterogeneity across sectors and countries Less well educated and older female workers aged 40 and above as well as those in low skill clerical service and sales positions are disproportionately exposed to automation Extrapolating our results we find that around 180 million female jobs are at high risk of being displaced globally Policies are needed to endow women with required skills close gender gaps in leadership positions bridge digital gender divide as ongoing digital transformation could confer greater flexibility in work benefiting women ease transitions for older and low skilled female workers
