Cyhn, 2002 This book analyses the technology development efforts of Korea s electronics industry the country s largest exporter It asks how the Korean electronics industry was able to develop both in terms of production and technology despite low inflows of licensing and foreign direct investments The book argues that the key to its spectacular growth has been through its participation and learning from an inter firm arrangement called original equipment manufacturing arrangement OEM A number of firm level case studies on the Korean electronics industry support this argument The role of the government especially related to its technology policy has also been analysed The government

was effective in providing financial incentives for the firms technological upgrading efforts but its supplying of direct technological assistance had limited success Overall this book argues that contrary to many previous studies the role of multinational enterprises has been significant in the development of Korea s electronics industry and that they have acted as a technological tutor for Korea through OEM P xiv tributors world 0 Globalisation, Economic Development & the Role of the State Ha-Joon Chang,2003 Ha Joon Chang evaluates the role of the state in economics and development In this collection of essays he reviews theories and practices of state intervention as they have developed over two centuries of modern capitalism He develops an institutionalist approach to the role of the state in economic change and examines the issues involved in particular settings including industrial policy trade policy intellectual property rights regulation and strategies towards transnational corporations He mounts a sophisticated theoretical and historical case for the continuing essential and constructive roles which the state can and must play in economic development **U.S.-India Technology Cooperation and Capability Building** Rakesh Basant,2004 Inter-firm Linkages and Development of Capabilites in the Indian Telecom Software Sector Rakesh Basant,2001 **Global Technology Cycles and Local Economic Performance** Sebastian Heinrich,Samad Sarferaz,Martin Wörter,2023 This paper studies the global synchronicity of technology and its impact on the economy We employ dynamic factor analysis to decompose patent data in different digital technologies for various countries into global and country specific factors Our findings confirm the existence of global and local technology cycles We further find a significant positive correlation between the estimated global technology index and a country s economic performance This positive effect is stronger in countries with broad technological exposure However a concentration in only few dominant technological fields seems to reduce the positive impact of the global technology cycle on a country s economic performance Globalisation, Economic Development, and the Role of the State Ha-Joon Chang,2003 Wiring Prometheus Peter J. Lyth,Helmuth Trischler,2004 The editors of this volume point out that globalization calls for global history history that treats the planet as a single complex entity Several of the chapters address the origins of globalization s first wave in the nineteenth century focusing on the interrelationship between economics and the spread of three pioneering inventions the steam engine the telegraph and the telephone Others chronicle the late twentieth century textile and bicycle industries the development of the ATM machine railroad modernization in France major software disasters and the culturally empowering effects of the cassette tape And three authors make fundamental arguments about the nature of globalization s changes how the ties binding Europeans have evolved from patronage to connections to networks how global interconnectedness has eliminated differences in the perception of time and how the key to understanding the dynamics of globalization lies in the local application of standardized technology
