Telecommunications Policy And Economic Development The New State Role:

Telecommunications Policy and Economic Development Jurgen Schmandt, Frederick Williams, Robert H. Wilson, 1989-09-25 Written for communications specialists and policy makers this book is a penetrating examination into the rapidly changing approach of states to telecommunications regulation and planning since the divestiture of AT T in January 1984 The editors place particular emphasis on the conjunction between the increasing state role in developing and implementing telecommunications policy and a new interest in economic development on the part of state governments Following a discussion of the major issues surrounding telecommunications regulation and an exploration of the links between telecommunications and economic development the experiences of nine states are considered in separate chapters The contributors also consider telecommunications applications for improving efficiency in state government The result is a comprehensive look at existing trends in state telecommunications regulation that will be invaluable not only to officials and legislators but also to students of communications policy Each of the nine state chapters includes a profile of the state s social and economic makeup a description of the policy environment a statement of regulatory policy and an analysis of the relationship between telecommunications and economic development in that state A number of chapters also include detailed case studies among them a study of New York s Teleport Nebraska s AGNET and Washington State s 1985 Regulatory Flexibility Act Based on their in depth study of the nine states experiences the editors argue that states need to become better informed about the changing telecommunications environment and its potential for improving efficiency in state government In addition both planning and regulation must be more related to economic development plans than they are currently in most states Finally the editors conclude that traditional state regulation of telecommunications companies is inadequate for establishing policy in this increasingly complex and important area

Telecommunications Rate Deregulation in Nebraska Milton Mueller,1992 State Water Policies Jurgen Schmandt,Ernest T. Smerdon,Judith Clarkson,1988-11-10 Written for communications specialists and policy makers this book is a penetrating examination into the rapidly changing approach of states to telecommunications regulation and planning since the divestiture of AT T in January 1984 The editors place particular emphasis on the conjunction between the increasing state role in developing and implementing telecommunications policy and a new interest in economic development on the part of state governments Following a discussion of the major issues surrounding telecommunications regulation and an exploration of the links between telecommunications and economic development the experiences of nine states are considered in separate chapters The contributors also consider telecommunications applications for improving efficiency in state governments The result is a comprehensive look at existing trends in state telecommunications regulations regulation that will be invaluable not only to officials ans legislators but also to students of communications policy Each of the nine state chapters includes a profile of the state s social and economic makeup a description of the policy environment a statement of regulatory policy and an analysis of the relationship between telecommunications and economic development in that state A number of chapters also include detailed case studies among them a study of New York s Teleport Nebraska s AGNET and Washington State s 1985 Regulatory Flexibility Act Based on their in depth study of the nine states experiences the editors argue that states need to become better informed about the changing telecommunications environment and its potential for improving efficiency in state government In addition both planning and regulation must be more related to economic development plans than they are currently in most states Finally the editors conclude that traditional state regulation of telecommunications companies is inadequate for establishing policy in this increasingly complex and important area **The New Urban Infrastructure** Jurgen Schmandt,1990-07-24 Traditionally city governments have played an active role in the administration of public works that were necessary to the economic survival of the community However a major element of the new urban infrastructure advanced telecommunications networks are developing in such a way that the municipal role in its development is minimal This book presents new information on the rapidly changing configuration of urban telecommunications The editors examine important planning data illustrating how major metro areas are dealing with new opportunities in telecommunication They describe the interplay among current stakeholders in this area public utility commissions city planners and service providers state governments telecommunications users especially large businesses and consumer groups The book provides case studies of major U S cities one Canadian city a metropolitan area on the U S Mexican border as well as smaller cities that have positioned themselves for international economic trade whereby telecommunications will play a major role The contributors find that cities need to be more involved in understanding how

telecommunications systems are changing and in planning how they can best exploit new opportunities afforded by these systems They contend that while telecommunication may not cause economic development it seems to be a necessary condition for it The book offers clear illustrations of the extent to which business users depend on communications The ability of business and government to bypass the local carrier has important implications for the public network and for cities in their use of telecommunication **Future Survey Annual** ,1993 *Forthcoming Books* Rose Arny,1989-09

Telecommunications and Rural Development Jurgen Schmandt,1991-10-30 This study assesses the potential that telecommunications advances hold for rural America and is the outcome of the third in a series of policy research projects into issues relating telecommunications policy and economic development undertaken by research teams of faculty and students at the Lyndon Baines Johnson School of Public Affairs and College of Communication University of Texas at Austin All three projects have been concerned with telecommunications at two levels the effects of telecommunications advances on our economy and society and the policy framework that has resulted from divestiture of AT the second which dealt with cities and large telecommunications users produced *The New Urban Infrastructure Cities and Telecommunications* Praeger 1990 Telecommunications and rural development has been much more frequently researched in Third World countries than in advanced industrialized ones and this volume represents a significant contribution to the literature on the subject The findings are divided into four general research areas Following an introduction Chapter Two looks at some fascinating telecommunications applications in American rural businesses from Wal Mart to traditional rural businesses like the lumber industry to the opening of new businesses like telemarketing Chapter Three assesses the use of telecommunication for delivery of public services from the U S Department of Agriculture to health care and distance education Chapter Four asserts that many of the benefits of telecommunications for rural America will only be realized if the small independent or cooperative telephone companies remain healthy and progressive The substantial contribution to community development from community revitalization and regional cooperation to infrastructure upgrading is the focus of Chapter Five A final chapter offers conclusions This is required reading for students scholars and practitioners in the fields of communications telecommunications and government **Recent Publications on Governmental Problems** ,1990 **YALE JOURNAL**
