Telecommunications Regulation:

Telecommunications Regulation John Buckley, 2003-07-18 Telecommunications Regulation discusses typical regulatory rules and the legal and administrative framework for regulation and looks at regulatory strategies market structures and approaches to price control

Telecommunications Regulation Clare Hall, Christopher Hood, Colin Scott, 2005-08-02 Using unprecedented access to the key actors inside the UK Office of Telecommunications OFTEL and supporting interviews this book explores how telecommunications regulation works from the inside

The Law and Regulation of Telecommunications Carriers Henk Brands, Evan T. Leo, 1999 In the wake of the Telecommunications Act of 1996 the true impact of this sweeping legislation is becoming increasingly evident This new casebook provides the first comprehensive up to date coverage of the radical effects this reform has had and continues to have on the entire telecommunications industry and on telephone companies in particular

Australian Telecommunications Regulation Alasdair Grant, 2004 Australian Telecommunications Regulation provides an accessible but comprehensive review of Australia's telecommunications regulatory framework Written by experienced insiders it describes the laws and policies affecting competitors and consumers and the regulatory and self regulatory bodies that administer them The third edition features a new chapter on interconnection pricing and incorporates all recent legislative reforms and policy initiatives including those affecting the telecommunications competition regime and discusses recent key decisions of the ACCC and other agencies

Regulating Telecommunications in the EU and China Bernd Holznagel, Junqi Xu, Thomas Hart, 2009 Chinese as well as European regulatory decisions need to consider regional particularities but insist on an implementation system that never loses sight of its goal In the area of electronic communications policy this goal is the establishment of a market environment that ensures innovation high quality and affordable prices The present survey aims at improving the process of knowledge exchange between European and Chinese experts and decision makers in Information Society law and policy The EU China Information Society Project asked the authors to assess both the EU's and the Chinese status quo and to bring together both perspectives together in a joint effort to learn from the EU experiences for the Chinese decision making process today

Telecommunications Regulation Nicholas Economides, 2013 This paper examines the justifications history and practice of regulation in the US telecommunications sector We examine the impact of technological and regulatory change on market structure and business strategy Among others we discuss the emergence and decline of the telecom bubble the impact on pricing of digitization and the emergence of Internet telephony We briefly examine the impact of the 1996 Telecommunications Act on market structure and strategy in conjunction with the history of regulation and antitrust intervention in the telecommunications sector After discussing the impact of wireless technologies we conclude by venturing into some short term predictions We express concern about the derailment of the implementation of the 1996 Act by the aggressive legal tactics of the entrenched monopolists the local exchange carriers and we point to the real danger that the

intent of Congress in passing the 1996 Act to promote competition in telecommunications will not be realized We also discuss the wave of mergers in the Telecommunications and cable industries the telecom meltdown of 2000 2003 and issues that arose from the triennial review by the FCC of implementation of the 1996 Act

The Politics of Telecommunications Regulation: The States and the Divestiture of AT&T Jeffrey E. Cohen,2019-07-26 Originally published in 1992 This text is a work from a series entitled Bureaucracies Public Administration and Public Policy The Politics of Telecommunication regulation The States and the Divestiture of AT T is an example of high quality policy analysis conducted at state level It substitutes for simple theories of public policy more complex and interesting explanations and relies on massive and time consuming data gathering that gives careful attention to measurement issues providing a sophisticated empirical analysis to evaluate the utility of public policy theories

Modern Economic Regulation Christopher Decker,2023-06-08 Brings economic regulation to life by tracing theoretical insights through to real world applications in eight essential regulated sectors

Policy Diffusion and Telecommunications Regulation Véronique Wavre,2018-01-22 This study investigates regulatory reforms in the telecommunications sector of Middle Eastern and North African MENA countries It explores telecommunications innovations in three developing economies Morocco Jordan and Egypt with a focus on regional and European trends in telecommunications policies Common knowledge suggests that the European Union and its member states are the main influential regulatory power in the MENA region However the empirical analysis of selected telecommunications regulations universal service obligation USO and spectrum management reveals that reforms are not always determined by European countries but may also originate from other developing countries such as Peru and Chile This finding attests to the rise of regulatory influence from the Global South which challenges traditional transfers of regulations originating from more industrially advanced countries

Global Markets and Government Regulation in Telecommunications Kirsten Rodine-Hardy,2013-03-25 In recent years liberalization privatization and deregulation have become commonplace in sectors once dominated by government owned monopolies In telecommunications for example during the 1990s more than 129 countries established independent regulatory agencies and more than 100 countries privatized the state owned telecom operator Why did so many countries liberalize in such a short period of time For example why did both Denmark and Burundi nations different along so many relevant dimensions liberalize their telecom sectors around the same time Kirsten L Rodine Hardy argues that international organizations not national governments or market forces are the primary drivers of policy convergence in the important arena of telecommunications regulation they create and

shape preferences for reform and provide forums for expert discussions and the emergence of policy standards Yet she also shows that international convergence leaves room for substantial variation among countries using both econometric analysis and controlled case comparisons of eight European countries Canadian Communication Policy and Law Sara Bannerman,2020-05-20 Canadian Communication Policy and Law provides a uniquely Canadian focus and perspective on telecommunications policy broadcasting policy internet regulation freedom of expression censorship defamation privacy government surveillance intellectual property and more Taking a critical stance Sara Bannerman draws attention to unequal power structures by asking the question whom does Canadian communication policy and law serve Key theories for analysis of law and policy issues such as pluralist libertarian critical political economy Marxist feminist queer critical race critical disability postcolonial and intersectional theories are discussed in detail in this accessibly written text From critical and theoretical analysis to legal research and citation skills Canadian Communication Policy and Law encourages deep analytic engagement Serving as a valuable resource for students who are undertaking research and writing on legal topics for the first time this comprehensive text is well suited for undergraduate communication and media studies programs Pike & Fischer Communications Regulation ,2004 **Internet and Telecommunications Regulation** Stuart Benjamin,Barak Richman,James Speta,2023-03-31 This title will be available in a looseleaf format for spring 2023 use The casebound book will be published later in the spring The second edition of Internet and Telecommunications Regulation has been completely revised with the authors adding large sections that place the regulation of internet services at the heart of the book The text is organized around regulatory themes including the use of antitrust and sector specific laws to respond to concerns about competition the constraints on regulation imposed by the First Amendment the relationship between state national and international regulation the role of copyright and statutory immunity for platforms from civil liability for third party content The book also includes important materials on the regulation of traditional telecommunications services not only because those services are important in their own right but also because the regulation of internet services builds on the regulation of traditional telecommunications services Internet and Telecommunications Regulation contains discussions and excerpts from legal materials to help readers understand current controversies regulatory strategies and the historical developments that led to them Summaries and previews at the start of each set of readings help students understand the relevance of the readings and the larger issues they present and questions at the end of each excerpt encourage students to think critically about those materials The organization easily permits the selection of material for courses focused on particular industries or on particular types of regulation Telecommunications Regulation Handbook Hank Intven,2000 The Handbook for Telecommunications Regulators provides regulators with a reference source on the main telecommunication regulatory practices and procedures currently utilized around the world **Cost Proxy Models and Telecommunications Policy** Farid Gasmi,2002 CD ROM contains Programs and data that verify report results presented in the text *Internet and*

Telecommunication Regulation Stuart Minor Benjamin, James B. Speta, 2019 This book provides a comprehensive and advanced analysis of Internet and Telecommunications Regulation drawing on administrative constitutional and economic issues that arise in these important industries This new book includes material from the authors previous book *Telecommunications Law and Policy* which focused on the traditionally regulated fields of broadcast telephony and cable television along with some materials on the Internet Reflecting the importance of Internet platforms and questions of their regulation the book has now been extensively updated with additional materials covering the Internet and specifically the extension of communications and other regulation to the Internet The key legal debate over net neutrality for example arises out of the foundational telecommunications statute and relies on distinctions that have been central to the regulation of telephony The book contains discussions and excerpts from legal materials to help readers understand current controversies regulatory strategies and the historical developments that led to them Summaries and previews at the start of each set of readings help students know what to read for and questions at the end of each excerpt encourage students to think critically about those materials The organization easily permits the selection of material for courses focused only on particular industries or only on particular types of regulation

After Divestiture Paul Teske, 1990-07-05 This book analyzes the politics of state regulatory decision making in telecommunications after the AT T divestiture in 1984 The author takes a political economy approach that explains how interest groups and institutional factors have shaped different state policies He shows that the structure and composition of state regulatory institutions have important effects on pricing and competition in the telecommunications industry The innovative methodology of this work combines qualitative empirical analysis from the entire U S with case studies of eight states It identifies the deregulation winners and losers by examining the impact of changes in local and long distance price structures on different groups including users of telecommunications services small businesses residential consumers and rural residents The book includes recommendations for improving state policy
