Telephone Medicine:

Telephone Medicine Anna B. Reisman, David L. Stevens, 2002 The telephone is now a significant component of medical care 25% of encounters between primary care physicians and patients involve its use Successful telephone medicine improves the rapport between doctor and patient increases access to care enhances patient satisfaction and lowers patient and physician costs Telephone medicine is no longer just renewing prescriptions A telephone call can clarify issues raised during the office visit help patients with decisions about their health care at home prevent unnecessary emergency department visits and communicate test results quickly and personally **American Medicine**, 1906 The Medical Interview Mack Jr. Lipkin, J.G. Carroll, R.M. Frankel, Samuel M. Putnam, Aaron Lazare, A. Keller, T. Klein, P.K. Williams, 2012-12-06 Primary care medicine is the new frontier in medicine Every nation in the world has recognized the necessity to deliver personal and primary care to its people This includes first contact care care based in a positive and caring personal relationship care by a single healthcare provider for the majority of the patient's problems coordination of all care by the patient's personal provider advocacy for the patient by the provider the provision of preventive care and psychosocial care as well as care for episodes of acute and chronic illness These facets of care work most effectively when they are embedded in a coherent integrated approach The support for primary care derives from several significant trends First technologically based care costs have rocketed beyond reason or availability occurring in the face of exploding populations and diminishing real resources in many parts of the world even in the wealthier nations Simultaneously the primary care disciplines general internal medicine and pediatrics and family medicine have matured significantly **New York State Journal of Medicine**, 1910 Telephony, 1913 **Advances in Medical Education** A.J.J.A. Scherpbier, Cees P.M. van der Vleuten, J.J. Rethans, A.F.W. van der Steeg, 2012-12-06 About 550 registrants from 51 different countries attended the Seventh Ottawa Conference on Medical Education and Assessment in Maastricht We received 525 abstracts for the conference divided in thematic poster sessions and platform presentations Organising the conference was an honour and we tried to meet the high standards of a friendly and relaxed atmosphere which has characterized previous Ottawa conferences During and after the conference about 250 papers were submitted for publication in the conference proceedings leaving us little time for a post conference depression Despite the large number of papers the editors have attempted to review and edit the papers as carefully as possible Occasionally however correspondence exceeded reasonable deadlines preventing careful editing of a small number of the papers Although we felt that our editorial task was not quite finished we nevertheless decided to include these papers We thank the many authors for their enthusiastic and prompt response to occasionally tedious editorial suggestions and requests We are sure that this collective effort has resulted in a book that will make an important contribution to the field of medical education The editors want to thank Jocelyn Flippo Berger whose expertise with desktop publishing and perseverance was a great help **Communication in Medical Care** John

Heritage, Douglas W. Maynard, 2006-07-06 This 2006 volume provides a comprehensive discussion of communication between doctors and patients in primary care consultations. It brings together a team of leading contributors from the fields of linguistics, sociology, and medicine to describe each phase of the primary care consultation, identifying the distinctive tasks, goals, and activities that make up each phase of primary care as social interaction. Using conversation analysis techniques, the authors analyze the sequential unfolding of a visit and describe the dilemmas and conflicts faced by physicians and patients as they work through each of these activities. The result is a view of the medical encounter that takes the perspective of both physicians and patients in a way that is both rigorous and humane. Clear and comprehensive, this book will be essential reading for students and researchers in sociolinguistics, communication studies, sociology, and medicine. Hearings United States. Congress.
