The Of Mourning:

The Meaning of Mourning Mikolaj Slawkowski-Rode,2023-01-09 Grief is a universal human response to death and loss Mourning is an equally universally observable practice that enables the bereaved to express their grief and come to terms with the reality of loss Yet despite their prevalence there is no unified understanding of the nature and meaning of grief and mourning The Meaning of Mourning Perspectives on Death Loss and Grief brings together fifteen essays from diverse disciplines addressing the topics of death grief and mourning The collection moves from general questions concerning the putative badness of death and the meaning of loss through the phenomenology and psychology of grief to personal and cultural aspects of mourning Contributors examine topics such as theodicy and grief reproductive loss mourning as a form of recognition of value the roots of grief in early childhood grief in COVID times hope phenomenology of loss public commemoration and mourning rituals mourning for a devastated culture the Necropolis of Glasgow and the art of outliving Edited by Mikolaj Slawkowski Rode the volume provides a survey of the rich topography of methodologies problems approaches and disciplines that are involved in the study of issues surrounding loss and our responses to it and guides the reader through a spectrum of perspectives highlighting the connections and discontinuities between them *Communities of Death* Adam C. Bradford,2014-12-18 To 21st century readers 19th century depictions of death look macabre if not maudlin the mourning portraits and quilts the postmortem daguerreotypes and the memorial jewelry now hopelessly if not morbidly distressing Yet this sentimental culture of mourning and memorializing provided opportunities to the bereaved to assert deeply held beliefs forge social connections and advocate for social and political change This culture also permeated the literature of the day especially the works of Edgar Allan Poe and Walt Whitman In *Communities of Death* Adam C Bradford explores the ways in which the ideas rituals and practices of mourning were central to the work of both authors While both Poe and Whitman were heavily influenced by the mourning culture of their time their use of it differed Poe focused on the tendency of mourners to cling to anything that could remind them of their lost loved ones Whitman focused not on the mourner but on the soul's immortality positing an inevitable reunion Yet Whitman repeatedly testified that Poe's Gothic and macabre literature played a central role in spurring him to produce the transcendent *Leaves of Grass* By unveiling a heretofore marginalized literary relationship between Poe and Whitman Bradford rewrites our understanding of these authors and suggests a more intimate relationship among sentimentalism romanticism and transcendentalism than has previously been recognized Bradford's insights into the culture and lives of Poe and Whitman will change readers understanding of both literary icons *A History of Mourning* Richard Davey,2013-12-09 *A History of Mourning* By Richard Davey Death Funerals and Lamentation Mourning is in the simplest sense synonymous with grief over the death of someone The word is also used to describe a cultural complex of behaviours in which the bereaved participate or are expected to participate Customs vary between different cultures and evolve over time though many core behaviors remain constant

Wearing black clothes is one practice followed in many countries though other forms of dress are also seen Those most affected by the loss of a loved one often observe a period of grieving marked by withdrawal from social events and quiet respectful behavior People may also follow certain religious traditions for such occasions Mourning may also apply to the death of or anniversary of the death of an important individual like a local leader monarch religious figure etc State mourning may occur on such an occasion In recent years some traditions have given way to less strict practices though many customs and traditions continue to be followed *The Materiality of Mourning* Zahra Newby,Ruth Toulson,2018-07-17 Tangible remains play an important role in our relationships with the dead they are pivotal to how we remember mourn and grieve The chapters in this volume analyse a diverse range of objects and their role in the processes of grief and mourning with contributions by scholars in anthropology history fashion thanatology religious studies archaeology classics sociology and political science The book brings together consideration of emotions memory and material agency to inform a deeper understanding of the specific roles played by objects in funerary contexts across historical and contemporary societies

The Many Faces Of Bereavement Ginny Sprang,John McNeil,2018-10-24 First published in 1995 Death and dying have been a concern of mankind as long as humans have existed This book will explore the development and specifications of traditional models of grief to underline the importance of what is known about the process of grief considering variables such as relationship age and personal characteristics of the mourner as well as providing a framework of symptomatology specific to non traumatizing non stigmatizing deaths for the purposes of comparative and theoretical specification It is proposed that what is known about the grief response following the death of a spouse a child or an aged parent has valuable implications for grief model development considering other modes of death such as murder drunk driving AIDS critical incidents and suicide though these conceptualizations are insufficient in explaining or predicting outcomes with these other types of grief
