## **The Open Man And Animal:**

**The Open** Giorgio Agamben,2003-10-23 The end of human history is an event that has been foreseen or announced by both messianics and dialecticians But who is the protagonist of that history that is coming or has come to a close What is man How did he come on the scene And how has he maintained his privileged place as the master of or first among the animals In The Open contemporary Italian philosopher Giorgio Agamben considers the ways in which the human has been thought of as either a distinct and superior type of animal or a kind of being that is essentially different from animal altogether In an argument that ranges from ancient Greek Christian and Jewish texts to twentieth century thinkers such as Heidegger Benjamin and Kojve Agamben examines the ways in which the distinction between man and animal has been manufactured by the logical presuppositions of Western thought and he investigates the profound implications that the man animal distinction has had for disciplines as seemingly disparate as philosophy law anthropology medicine and politics

**Animal Lessons** Kelly Oliver,2009-10-08 Philosophy reads humanity against animality arguing that man is man because he is separate from beast Deftly challenging this position Kelly Oliver proves that in fact it is the animal that teaches us to be human Through their sex their habits and our perception of their purpose animals show us how not to be them This kinship plays out in a number of ways We sacrifice animals to establish human kinship but without the animal the bonds of brotherhood fall apart Either kinship with animals is possible or kinship with humans is impossible Philosophy holds that humans and animals are distinct but in defending this position the discipline depends on a discourse that relies on the animal for its very definition of the human Through these and other examples Oliver does more than just establish an animal ethics She transforms ethics by showing how its very origin is dependent upon the animal Examining for the first time the treatment of the animal in the work of Heidegger Merleau Ponty Derrida Agamben Freud Lacan and Kristeva among others Animal Lessons argues that the animal bites back thereby reopening the question of the animal for philosophy

**The Resounding Soul** Samuel Kimbriel, Eric Austin Lee,2016-09-29 It is surely not coincidental that the term soul should mean not only the centre of a creature's life and consciousness but also a thing or action characterised by intense vivacity that bike's got soul It also seems far from coincidental that the same contemporary academic discussions that have largely cast aside the language of soul in their quest to define the character of human mental life should themselves be so bloodless or so lacking in soul The Resounding Soul arises from the opposite premise that the task of understanding human nature is bound up with the more critical task of learning to be fully human The papers collected here are derived from a conference in Oxford sponsored by the Centre of Theology and Philosophy and explore the often surprising landscape that emerges when human consciousness is approached from this angle Drawing upon literary philosophical theological historical and musical modes of analysis these essays remind the reader of the power of the ancient language of soul over against contemporary impulses to reduce fragment and overly determine human selfhood
