Research Handbook on Human Rights and Poverty Martha F. Davis,Morten Kjaerum,Amanda Lyons,2021-03-26 This important Research Handbook explores the nexus between human rights poverty and inequality as a critical lens for understanding and addressing key challenges of the coming decades including the objectives set out in the Sustainable Development Goals The Research Handbook starts from the premise that poverty is not solely an issue of minimum income and explores the profound ways that deprivation and distributive inequality of power and capability relate to economic social cultural civil and political rights

The Future of Training in Psychotherapy and Counselling John Rowan,2014-02-25 The Future of Training in Psychotherapy and Counselling presents a revealing and stimulating account of the current state of training that demonstrates how training will have to adapt if it is to successfully meet the needs and challenges of the future In an attempt to look afresh at the whole question of training John Rowan proposes that there are three ways of doing therapy and any examination of training has to consider each of these the instrumental where the main emphasis is on the treating the client or patient the authentic way where the main emphasis is on meeting the client or patient the transpersonal way where main emphasis is on linking with the client in a more personal way Each approach makes different assumptions about the self about the relationship and about the level of consciousness involved in doing therapy By challenging the basic precepts of traditional training John Rowan encourages the reader to reconsider subjects including the difference between counselling and psychotherapy culture and ethics the origins of disturbance in clients and child development The Future of Training in Psychotherapy and Counselling provides a much needed new perspective that will compel all psychotherapists and counsellors to take a closer look at training in the field

Intellectual Disabilities - E-Book Helen Atherton,Debbie Crickmore,2022-03-13 This leading textbook previously known as Learning Disabilities aims to further the practice of professionals and agencies who support people with intellectual disabilities It emphasizes the strengths rather than deficits of people with intellectual disabilities highlights the crucial role of family and friends and places individuals firmly at the heart of everything that impacts them Intellectual Disabilities Toward Inclusion centres on the concepts of respecting the personhood of people with intellectual disabilities and their rights to holistic health and to live their best lives Most of the 27 chapters are co authored by respected international authors and the content has been fully updated to reflect contemporary policy legislation and service configuration This unique text will challenge and reframe typically held views and provides an international focus that recognizes we have much to learn from the experiences and perspectives of other nations around the world Comprehensive overview of the field relevant to contemporary practice Content organized around three central themes

W. Konings,Hugo Priemus,Peter Nijkamp,2005 This book explores the many challenges faced by the development and implementation of automated freight transport systems It offers a unique overview of current applications developments and future perspectives The subject of automation is not covered extensively in the existing literature on freight transport and this book aims to fill the gap In view of the increasing difficulties in coping with growing transport volumes in an efficient and sustainable way the development of new automated freight applications could be a viable alternative The first chapters

of the book are devoted to an overview of concepts and current research developments in automated transport outlining the opportunities barriers and threats for further development paths for different transport modes The authors then go on to focus on innovative tools to design and evaluate these new transport developments The book closes with a detailed and critical analysis of what is probably the most critical part of system innovation that is the implementation of automated systems Written from a multi disciplinary perspective which reflects the diversity of the relevant issues needing consideration when designing developing and implementing such systems this book will be an invaluable source for scholars and researchers of innovation and transport studies In addition the book will be useful to policymakers and practitioners involved in the design development and implementation of new technologies for freight transport It may also appeal to wider readers with an interest in the future of freight transport systems [Harvard Business Review](#) ,1998
