Abel, Thomas Harrison Cummings, Wilfred A. French, A. H. Beardsley, 1919 The Balanced Brain Camilla Nord, 2025-01-21 How we can use what we've learned about the brain to improve our mental health There are many routes to mental well being In this groundbreaking book neuroscientist Camilla Nord offers a fascinating tour of the scientific developments that are revolutionising the way we think about mental health showing why and how events and treatments can affect people in such different ways In The Balanced Brain Nord explains how our brain constructs our sense of mental health actively striving to maintain balance in response to our changing circumstances While a mentally healthy brain deals well with life's turbulence poor mental health results when the brain struggles with disruption But just what is the brain trying to balance Nord describes the foundations of mental health in the brain from the neurobiology of pleasure pain and desire to the role of mood mediating chemicals like dopamine serotonin and opioids She then pivots to interventions revealing how antidepressants placebos and even recreational drugs work how psychotherapy changes brain chemistry and how the brain and body interact to make us feel physically as well as mentally healthy Along the way Nord explains how the seemingly small things we use to lift our moods a piece of chocolate a walk a chat with a friend work on the same pathways

in our brains as the latest treatments for mental health disorders Understanding the cause of poor mental health is one of the crucial questions of our time But the answer is unique to each of us and it requires finding what helps our brains rebalance and thrive With so many factors at play there are more possibilities for recovery and resilience than we might think

Parrott,2019-09-05 We all take it for granted that we are typically in a position to know about the thoughts and feelings of other people But we might naturally wonder how we acquire this kind of knowledge Knowing Other Minds brings together ten original chapters written by internationally renowned researchers on questions that arise from our everyday social interaction with others Can we have direct perceptual knowledge of another person s thoughts How do we acquire general conceptions of mental states What lessons can be drawn from experimental work in developmental psychology Are there fundamental differences between the ways in which we acquire knowledge of our own minds and the ways in which we acquire knowledge of someone else s mind What sort of cognitive processing underlies our everyday social understanding How should we best think of the relationship between our complex social life and moral value The chapters in this volume convey a variety of different perspectives and make a number of novel contributions to the existing literature on these questions thereby opening up new avenues of inquiry Furthermore they illustrate how questions in philosophy and questions from empirical cognitive science overlap and mutually inform one another **Romances and narratives, ed. by G.A.**
