Commodity Prices Javier Gómez-Pineda,Mr.Dominique M. Guillaume,Kadir Tanyeri,2015-07-20 The paper presents a global
model with systemic and country risks as well as commodity prices We show that systemic risk shocks have an important
impact on world economic activity with the busts in world output gap corresponding to unobserved systemic risk associated
with major financial events In addition systemic risk shocks are shown to be important drivers of output gaps while country
risk premium shocks can have important effects on the trade balance Commodity prices in particular the price of oil are
shown to be demand driven The model performs well at one and four quarter horizons compared to a survey of analysts
forecasts In addition systemic risk shocks explain a large share of the forecast variance for the world output gap country
output gaps the price of oil and country risk premiums The importance of systemic risk shocks lends support for financial
