Statistical Methods In Management:

Statistical Methods in Management Tom Cass,1973 **The Use of Statistical Methods in Management Research** Michael Wood,2015 This article uses a case study of the methods used in a research paper in the Academy of Management Journal to present a critique on two levels of the way statistical methods are used in management research First I argue that the way statistical analysis is typically presented is unnecessarily obscure and suffers from an over emphasis on null hypothesis significance testing Some practical suggestions are made for tackling these problems These include an easy way to use p values to derive more user friendly confidence levels and a graphically presented bootstrap resampling method implemented on a spreadsheet to show the conclusions which might have followed from different samples from the same source this leads to a way of assessing confidence levels for any hypothesis about a relationship between variables Second the article analyses the value and limitations of adopting a statistical approach in a given management research project These arguments lead to a series of recommendations for the sensible use of statistical methods for researching management issues **StatsNotes** Alan Jessop,2016 Managers need access to some statistical advice from time to time to help in solving business problems Students need access to statistical methods to support work in non statistics courses case studies and projects What is needed will depend on the demands of the problem and how much statistics the manager or student already knows The requirement is for flexible decision support This unique book presents statistical ideas and models in easily accessible form describing both methods and issues of application statsNotes are organized as a set of over one hundred notes rather than as a number of chapters This enables managers and students to locate just what they need for the problem they have Each note consists of a description of what to do an example the rationale links to other notes Managers and students can choose to use as many notes as necessary which might be just one note or a set of linked notes Deciding which method will be helpful depends not just on finding an appropriate statistical method but on the business context too statsNotes provide advice at three levels Business fit problems from a business viewpoint and how some statistics might help Perspectives discussion of issues with widespread implications Implementation how to use a model or method While the range of topics covered is similar to those in introductory textbooks and courses the focus is on management decision and the methods for dealing with risky decisions and management judgment in this book are usually found in more specialist texts **Quantitative Methods in Project Management** John C.
