Taxation in Developing Countries Roger Gordon, 2010-07-05 Taxes are a crucial policy issue especially in developing countries Just recently proposals to raise middle class taxes toppled the Bolivian government and plans to extend or increase the value added tax caused political unrest in Ecuador and Mexico Despite the impact of tax policy on developing countries a comprehensive study has yet to be written Treating Argentina Brazil India Kenya Korea and Russia as key case studies this volume outlines the major aspects of current tax codes and explores their economic and political implications Examples of both the poorest and wealthiest developing countries Argentina Brazil India Kenya Korea and Russia uniquely demonstrate the diverse fiscal problems of tax reform Each economy relies heavily on indirect and corporate income taxes though recently some have reduced their tariff rates and have switched from excise to value added taxes There is a large informal economy in most of these countries and tax evasion by firms is a significant concern As a result tax revenue remains low even though rates are as high as those in developed economies Also unconventional methods to collect revenue have been implemented including bank debit taxes state ownership of firms and

implicit taxes on individuals in the informal sector Exploring these and other concerns as well as changes in tax law administration and fiscal pressures this comprehensive anthology clarifies the current landscape of tax administration and the economic future of the world's poorer economies **Fiscal Federalism Dimensions of Tax Reform in Developing Countries** Robin W.
