And Sadly Teach Jurgen Herbst, 1989 To lend weight to his charge that the public school teacher has been betrayed and gravity to his indictment of the educational establishment for that betrayal Jurgen Herbst goes back to the beginnings of teacher education in America in the 1830s and traces its evolution up

to the 1920s by which time the essential damage had been done Initially attempts were made to upgrade public school teaching to a genuine profession but that ideal was gradually abandoned In its stead with the advent of newly emerging graduate schools of education in the early decades of the twentieth century came the so called professionalization of public education At the expense of the training of elementary school teachers mostly women teacher educators shifted their attention to the turning out of educational specialists mostly men administrators faculty members at normal schools and teachers colleges adult education teachers and educational researchers Ultimately a history of the neglect of the American public school teacher And Sadly Teach ends with a plea and a message that ring loud and clear The plea that the current reform proposals for American teacher education the Carnegie and the Holmes reports be heeded The message that the key to successful school reform lies in educating teacher s true professionals and in acknowledging them as such in their classrooms

achievement of greater justice in schooling and in the broader society A major theme that comes up in different ways across the chapters is Zeichner s belief that the mission of teacher education programs is to prepare teachers in ways that enable them to successfully educate everyone s children A second theme is an argument for a view of democratic deliberation in schooling teacher education and educational research where members of various constituent groups have genuine input into the educational process Teacher Education and the Struggle for Social Justice is directed to teacher educators and to policy makers who see teacher education as a critical element in maintaining a strong public education system in a democratic society

[Navigating Teacher Education in Complex and Uncertain Times](#) Carmen I. Mercado, 2019-04-04 Carmen I Mercado draws on four decades of seminal research and theory on how American children who come from homes where languages other than English are spoken learn to read and to write in school to reveal aspects of locally responsive planning and adaptations that should be central to any teacher education program that hopes to serve its unique local population base

responsibly Mercado uses a range of theoretical lenses particularly those surrounding critical theory the approach designed to deconstruct power relationships in society to capture and explain the complexities of the teaching learning process making visible institutional social and political influences clear She explores an extensive collection of tools and resources for teaching to explore how educators can inform their thinking and shape their own practices to broaden access to people and resources and to influence classroom instruction as school populations becomes increasingly diverse on a global scale through immigration Mercado also shows how self study has been a key aspect of her program s evolution suggesting that teacher education should be informed by teacher educators own investigations into their own programs and processes that each teacher educator ought to be an active reinventor of her own program based on reflection on current data Mercado sensitively draws together the technical and emotional dimensions of learning to teach acknowledging that critical theory can bring up deep often uncomfortable feelings of anger guilt resentment and other responses to unfair conditions However since schools are designed as places of opportunity facing these responses is essential at a time with the feelings of antagonism that characterize the present day world and its conflictual social groups Mercado offers the opportunity to address these facets of educational process in compelling informed ways
