manifoldness is valuable not merely in contributing to conceptual clarity but in that this recognition sheds light on the complicated problem of punishment's justification. Insofar as they narrowly presuppose that punishment is criminal, punishment's most apparent solutions to the tension between consequentialism and retributivism are rather unenlightening if we attempt to apply them in other contexts. Moreover, this presupposition has given rise to an unwieldy variety of accounts of retributivism which are less helpful in contexts other than criminal punishment. Treating punishment comprehensibly helps us to better understand how it differs from similar phenomena and to carry on the discussion of its justification fruitfully.
