

and experience even are only accepted by them when they are supporting their own opinions, corroborating their own views. But whenever any truth contravenes their belief, what they hold to be true; whenever any facts or experiences, any results of scientific disquisitions explode their old fashioned, untenable, yet to them venerable notions, then their ire is roused; their zeal fired. They not only refuse to hear calmly, to investigate impartially the claims or merits of an opposite truth, but reject it with contempt, without deigning, or rather daring, to inquire into its merits. Yea, more! They not only reject such, to them new, truths, facts or results with indignation, but even scorn, hate, condemn and persecute those who maintain, promulgate or defend them. And yet it is but these impartial investigations into the nature of things; these scientific divings into the recesses of nature and the bringing out of hidden truths by them; these fearless soundings of facts in order to enrich and rectify our knowledge that ought to be the foundation of our belief, the monitors of our actions; as it is they that constitute and manifest the excellence and superiority of man over mere brutes. For man does not, and shall not, act unthinkingly—moved only by mere instinct—but by reasoning consciousness. He shall, therefore, not be satisfied with the sum of already acquired truths, but shall never cease to examine, strive to enlarge and endeavor to augment and improve them; shall for ever aspire to newer and higher truths, to a more and better understanding of nature, to a fuller and better knowledge of himself, the essence of his being and destination, his desires, aspirations and means of his true happiness.

Discovering God Rodney Stark, 2007-10-02 Discovering God is a monumental history of the origins of the great religions from the Stone Age to the Modern Age. Sociologist Rodney Stark surveys the birth and growth of religions around the world from the prehistoric era of primal beliefs, the history of the pyramids found in Iraq, Egypt, Mexico, and Cambodia, and the great Axial Age of Plato, Zoroaster, Confucius, and the Buddha to the modern Christian missions and the global spread of Islam. He argues for a free market theory of religion and for the controversial thesis that under the best unimpeded conditions, the true, most authentic religions will survive and thrive. Among his many conclusions: Despite decades of faulty reports that early religions were crude muddles of superstition, it turns out that primitive humans had surprisingly sophisticated notions about God and Creation. The idea of sin appeared suddenly in the sixth century BCE and quickly reshaped religious ideas from Europe to China. Some major world religions seem to lack any plausible traces of divine inspiration. Ironically, some famous figures who attempted to found godless religions ended up being worshiped as gods. Most people believe in the existence of God or gods, and this has apparently been so throughout human history. Many modern biologists and psychologists reject these spiritual ideas, especially those about the existence of God, as delusional. They claim that religion is a primitive survival mechanism that should have been discarded as humans evolved beyond the stage where belief in God served any useful purpose. That in modern societies, faith is a misleading crutch and an impediment to reason. In *Discovering God*, award-winning sociologist Rodney Stark responds to this position, arguing that it is our capacity to understand God that has evolved, that humans now know much more about God than they did in ancient times. Religion, Emergence, and the Origins of Meaning Paul Cassell, 2015-05-12 Why is religion so important to individuals and societies? What gives religion its profound meaningfulness and longevity? Enhancing perspectives taken from sociology and ritual theory, *Religion, Emergence, and the Origins of Meaning* describes how emergence theory developed to make sense of life and mind, explains why religious communities are special when compared to ordinary human social groups.

Paul Cassell argues that in religious ritual beliefs concerning unseen divine agencies are made uniquely potent inviting and guiding powerful alternative experiences and giving religious groups a form of organization distinct from ordinary human social groups Going beyond the foundational descriptions of mile Durkheim and Roy Rappaport Cassell utilizes the best of 21st century emergence theory to characterize religion s emergent dynamics *Abstracts of The Collected Works of C.
