The Other:

Politics of the 'Other' in India and China Lion Koenig, Bidisha Chaudhuri, 2016-02-22 The social sciences have been heavily influenced by modernization theory focusing on issues of economic growth political development and social change in order to develop a predictive model of linear progress for developing countries following a Western prototype Under this hegemonic paradigm of development the world tends to get divided into simplistic binary oppositions between the West and the rest us and them and self and other Proposing to shift the discussion on what constitutes the Other as opposed to the Self from philosophy and cultural studies to the social sciences this book explores how the structural asymmetries existing between Western discourses and the realities of the non Western world manifest themselves in the ideas institutions and socio political practices of India and China and in how far they shape the social scientist s understanding of their discipline in general It provides a counter narrative by revealing the relativity of geographies and by showing that the conventional presentation of core elements of the Asian socio political set up as aberrations from the Western models fails to acknowledge their inherent strategic character of adapting Western concepts to meet local requirements Drawing on multiple disciplines concepts and contexts in India and China the book makes a valuable contribution to the theory and practice of politics as well as to International and Asian Studies

Understanding the Other Jaco Beyers, 2017-08-31 In a religious pluralistic society the other cannot be ignored even less so when there is a familial relationship between religions The way in which Judaism and Christianity relate can be conceptualised in many different forms depending on the theory one subscribes to Did Judaism and Christianity derive from a common ancestor Did Christianity spring from Judaism and if so when Why did the final cut between the two take place Did Christianity replace Judaism If so how can the relationship between them now be described Before interaction between the two religions is possible an honest and unbiased attempt to understand each other must be mutual This is a painful and difficult exercise as Christians and Jews seem to have been at odds since forever This publication is not the final word on the relationship but perhaps it serves as an invitation to Jews and Christians for peaceful engagement

To the Other Shore Steven Cassedy, 2014-07-14 To the Other Shore tells the story of a small but influential group of Jewish intellectuals who immigrated to the United States from the Russian Empire between 1881 and the early 1920s the era of mass immigration This pioneer group of Jewish intellectuals many of whom were raised in Orthodox homes abandoned their Jewish identity absorbed the radical political theories circulating in nineteenth century Russia and brought those theories with them to America When they became leaders in the labor movement in the United States and wrote for the Yiddish Russian and English language radical press they generally retained the secularized Russian cultural identity they had adopted in their homeland together with their commitment to socialist theories This group includes Abraham Cahan longtime editor of The Jewish Daily Forward and one of the most influential Jews in America during the first half of this century Morris Hillquit a founding figure of the American socialist movement Michael Zametkin and his wife Adella Kean both journalists

and labor activists in the early decades of this century and Chaim Zhitlovsky one of the most important Yiddish writers in modern times These immigrants were part of the generation of Jewish intellectuals that preceded the better known New York Intellectuals of the late 1920s and 1930s the group chronicled in Irving Howe's *World of Our Fathers In To the Other Shore* Steven Cassedy offers a broad clear eyed portrait of the early Jewish emigr intellectuals in America and the Russian cultural and political doctrines that inspired them Originally published in 1997 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Human Rights and the Body Dr Annabelle Mooney,2014-09-28 *Human Rights and the Body* is a response to the crisis in human rights to the very real concern that without a secure foundation for the concept of human rights their very existence is threatened While there has been consideration of the discourses of human rights and the way in which the body is written upon research in linguistics has not yet been fully brought to bear on either human rights or the body Drawing on legal concepts and aspects of the law of human rights Mooney aims to provide a universally defensible set of human rights and a foundation or rather a frame for them She argues that the proper frames for human rights are firstly the human body seen as an index reliant on the natural world secondly the globe and finally language These three frames generate rights to food water sleep and shelter environmental protection and a right against dehumanization This book is essential reading for researchers and graduate students in the fields of human rights and semiotics of law

The Unity of the Common Law Alan Brudner,2013-10-03 In this classic study Alan Brudner investigates the basic structure of the common law of transactions For decades that structure has been the subject of intense debate between formalists who say that transactional law is a private law for interacting parties and functionalists who say that it is a public law serving the collective ends of society Against both camps Brudner proposes a synthesis of formalism and functionalism in which private law is modified by a common good without being subservient to it Drawing on Hegel's legal philosophy the author exhibits this synthesis in each of transactional law's main divisions property contract unjust enrichment and tort Each is a whole composed of private law and public law parts that complement each other and the idea connecting the parts to each other is also latently present in each Moreover Brudner argues a single narrative thread connects the divisions of transactional law to each other Not a row of disconnected fields transactional law is rather a story about the realization in law of the agent's claim to be a dignified end master of its body its acquisitions and the shape of its life Transactional law's divisions are stages in the progress toward that goal each generating a potential developed by the next Thus contract law fulfils what is incompletely realized in property law negligence law what is germinal in contract law public insurance what is seminal in negligence law and transactional law as

a whole what is underdeveloped in public insurance The end point is the limit of what a transactional law can contribute to a life sufficient for dignity Reconfigured and expanded with a contribution by Jennifer Nadler The Unity of the Common Law stands out among contemporary theories of private law in that it depicts private law as purposive without being instrumental and as autonomous without being empty formal Cure of the Evils in the Church of Scotland and Other Papers. First Series Joseph Miller (B.D.),1875 Passions of the Mind Harold N. Boris,1993-10 Passions of the mind advances the view that as social animals we are only partly understandable in terms of individual psychodynamics Within us another principle is at work to preserve the Group even at the expense of the individual As we pursue our own individual courses in life seeking egoistic satisfactions we are bound by countervailing forces biologically rooted social in nature which cause us to identify with the aims of the Group even if that requires of us a failure to thrive indeed our very deaths In this three way synthesis of classical psychoanalysis recent interpersonal and object relations psychology and current selectivistic evolutionary biology Professor Harold N Boris draws on the work of Melanie Klein and Wilfred R Bion and provides a bridge between the personal and biosocial psychologies of which we are made up He elaborates on his concepts of the Couple which involves the pleasure principle and egoistic identity and the Pair which enlists his newly proposed selection principle in representing social identity and biological imperatives Professor Boris shows how these two states of mind each with its own characteristic themes and variations feelings and fantasies and presences and absences at once compete conjoin and intertwine in the paradoxical dialectic of psychoanalysis In the latter half of the book Professor Boris provides a transcript of an analysis a composite of what the experience in the consulting room is both for the patient and analyst These illustrative sessions complete with commentary give the reader a rare glimpse of a living psychoanalysis in process In addition to his day to day work in the psychoanalytic consulting room Boris brings to this subtle and scholarly book his analytic work in many other settings in day and overnight schools for normal and disturbed children in rural villages and urban centers and with individuals and groups

The Feeling Body Giovanna Colombetti,2014-01-01 A proposal that extends the enactive approach developed in cognitive science and philosophy of mind to issues in affective science In The Feeling Body Giovanna Colombetti takes ideas from the enactive approach developed over the last twenty years in cognitive science and philosophy of mind and applies them for the first time to affective science the study of emotions moods and feelings She argues that enactivism entails a view of cognition as not just embodied but also intrinsically affective and she elaborates on the implications of this claim for the study of emotion in psychology and neuroscience In the course of her discussion Colombetti focuses on long debated issues in affective science including the notion of basic emotions the nature of appraisal and its relationship to bodily arousal the place of bodily feelings in emotion experience the neurophysiological study of emotion experience and the bodily nature of our encounters with others Drawing on enactivist tools such as dynamical systems theory the notion of the lived body neurophenomenology and phenomenological accounts of empathy Colombetti advances a novel approach to these traditional

issues that does justice to their complexity Doing so she also expands the enactive approach into a further domain of inquiry one that has more generally been neglected by the embodied embedded approach in the philosophy of cognitive science
