and education Dialectical Thinking and Adult Development Michael Basseches,1984 This book describes and illustrates the nature of dialectical thinking as a cognitive psychological phenomenon and makes the case that this form of cognitive organization is a possible successor to the adolescent formal operations stage It uses the idea of dialectical thinking to organize theory and research on adult forms of reasoning about specific kinds of issues into a rich and coherent conceptual framework for the study of adult development This framework makes feasible an approach to the study of adult development firmly rooted in the genetic epistemological tradition as an alternative to the approaches which currently dominate the field

Adult Development Michael L. Commons,1989-08-22 In recent years a number of researchers have begun to question the Piagetian theory that cognitive structural development ends with the adolescent's acquisition of formal operations and have begun to focus on the development of thought in late adolescence and adulthood This volume brings together the work of numerous scholars in cognitive social and perceptual development to explore the nature of postformal thought The contributors represent the diversity of models and approaches that characterize the ongoing research in this area and at the same time act to unify this body of literature within a common framework of analysis Students researchers and practicing psychologists will find here important new insights into the evolution of thought processes throughout the human lifespan A number of the papers present alternative but closely related models of postformal cognition as well as techniques of measuring postformal thought Of special interest is the presentation of data supporting claims that thought represents a stage qualitatively distinct from the transition between hierarchical and formal operations The opening chapter describes Beethoven's cognitive development in late adolescence and adulthood while subsequent essays discuss the modifications of formal structures that develop in the attempt to use formal reasoning in real life problem solving A set of studies that extend the study of postformal thought into the domains of moral thought and social reasoning complete the volume **Human**
